Research activities:

Goodbye to Projects? The Institutional Impacts of a Livelihoods Approach on Development Interventions. This project, funded by DFID through the Social Science Research Committee, started in April 2001 ending in December 2003, explores how and why sustainable livelihoods approached are being used in the planning and delivery of development interventions.

PhD research examines the impact of two attempts, in South Africa and Tanzania, to promote community-based planning systems as a means of tackling poverty and social exclusion.

Consultancy and advisory assignments:

- July 1996-present** On-going support to Uchira Village Council, Tanzania in order to find volunteer teachers and to access funds for Village development projects.
- Nov-Apr 2000** Research for Permaculture Association UK into how to support permaculture in developing countries.
