**Module Descriptor**

**Bioarchaeology: Humans, Plants and Animals**

Module Code: ARC5029-B  
Academic Year: 2018-19  
Credit Rating: 20  
School: School of Archaeological and Forensic Sciences  
Subject Area: Archaeology  
FHEQ Level: FHEQ Level 5  
Module Leader: Dr Gillian Thompson

Additional Tutors:  
Dr Julie Bond, Dr Jo Buckberry

Pre-requisites:  
Co-requisites:

**Module Aims**

To provide the bioarchaeological context of analysing human, faunal and floral remains from the archaeological record and to acquire basic skills in the identification of these remains.

**Outline Syllabus**
This module will introduce students to methods of identification and interpretation of the remains of humans, animals and plants. Typically the module will explore: identification, sex assessment and age estimation of human remains; identification, age and sex assessment, pathology and butchery of animal remains; identification and interpretation of woods and cereals; domestication; resource use and the reconstruction of subsistence strategies.

**Module Learning Outcomes**

*On successful completion of this module, students will be able to...*

1. Evaluate the theoretical and practical issues surrounding the preservation, recovery, analysis and interpretation of ancient human, botanical and zoological evidence.

2. Identify and categorise human remains and recognise common botanical and faunal remains recovered from archaeological sites. This will include identification to element of a selection of more robust and common remains from selected human assemblages, domesticated cereals and livestock.

3. Analyse archaeological evidence for past economic and dietary strategies.

4. Explain conclusions based on bioarchaeological data.

**Learning, Teaching and Assessment Strategy**

Context information and the foundations of diagnostic and identification skills for bioarchaeological remains will be delivered in lectures. The analysis of ecofactual evidence will be taught and trained in practical sessions. During Directed Study hours students are expected to undertake reading to consolidate and expand on the content of formal taught sessions; research and prepare for assessments; and undertake specific elements of reading as directed.

Assessment involves a portfolio of work carried out during and after practical classes and will probe identification and diagnostic skills, and the understanding of bioarchaeological methods and interpretation of datasets.
