Forensic Taphonomy

Module Code: ARC7017-B
Academic Year: 2018-19
Credit Rating: 20
School: School of Archaeological and Forensic Sciences
Subject Area: Forensic Science
FHEQ Level: FHEQ Level 7 (Masters)

Pre-requisites:
Co-requisites:

Module Aims

This module provides a detailed understanding of the principles and practice relating to forensic taphonomy. This includes the degradation of human bodies and associated materials under a range of terrestrial and underwater environments.

Outline Syllabus

Module Learning Outcomes

On successful completion of this module, students will be able to...

1. Synthesise evidence of forensic taphonomy, soil biology, chemistry to interpret the degradation of human cadavers and a range of materials in the depositional environment.

2. Evaluate the problems associated with forensic taphonomy and investigations of degradation mechanisms in both field and laboratory experiments.

3. Interpret theories of decay processes associated with the human body under a range of different depositional environments and explain the factors that will promote or retard soft tissue decomposition.

4. Synthesise the differences between transit graves, secondary burials and 'no body cases' where a body has partially decayed and been subsequently moved.

5. Evaluate written source material.

6. Set up a series of casework related experiments to aid the interpretation of results.

7. Record observations and experimentation, including experimental design, in a logical, comprehensive and contemporaneous manner in keeping with established and accepted codes of good practice.

Learning, Teaching and Assessment Strategy

Lectures cover the key issues. Workshops and demonstrations explore specific topics of forensic taphonomy, especially a critical approach to experimental design. Practicals and fieldwork introduce both field taphonomic experiments and electrochemical corrosion. Students will use Directed Study for reading of literature detailed in the module documentation and for researching and preparing for coursework.
