Module Aims

To develop the competencies of students to critically appraise a business problem and to plan and conduct relevant research, both individually and co-operatively, leading to an applied entrepreneurial solution:

(i) a conceptual understanding which enables you to analyse and evaluate published research
(ii) a conceptual understanding of appropriate research designs
(iii) a systematic understanding of data collection and analysis methods to enable you to apply research methods concepts and skills to your own research projects.
Outline Syllabus

Understanding and Evaluating published research
Introduction and managing the research process
Research design and methodologies
Research skills
Questionnaire design
Quantitative research
Qualitative research
Designing a rigorous research proposal for realising entrepreneurial opportunities.

Module Learning Outcomes

*On successful completion of this module, students will be able to...*

1. a. Demonstrate knowledge of systematic approaches to problem solving;
   b. Demonstrate a critical understanding of the role of information/data in informing business decision making;
   c. Demonstrate an understanding of the different types of data and their application in the context of business and social enterprise
   d. Demonstrate knowledge of a wide range of data collection and analytical techniques, including qualitative and quantitative
   e. Apply ethical considerations to research activities.

2. a. Critically appraise research, information and reports to support the formulation of solutions to problems in business and society at large;
   b. Scope a project and develop a research plan that is achievable within the defined constraints of time, cost and quality;
   c. Identify and select appropriate methods of data collection and analysis for a range of problems in the context of business and social enterprise.
   d. Use data and information to appraise the feasibility of an entrepreneurial opportunity.

3. a. Lead and work within a team to develop applied solutions to real-world problems
   b. Demonstrate and apply adaptability and originality in finding innovative solutions
   c. Effectively communicate innovative ideas and information to a wider audience orally and in writing.

Learning, Teaching and Assessment Strategy

Lectures and seminars will provide you with the information required to enhance your knowledge and gain critical awareness of business research methods (LO 1a, 1b, 1c, 1d, 2a, 2b, 3a, 3b). Seminars will provide you with the opportunity to examine, assess and solve real world research problems and to develop practical skills in constructing research based solutions to practical business problems (LO 1a, 2a,b,3a). Seminars and lectures will also enable you to develop skills in addressing practical research problems and issues through engagement with live projects in local, social and international contexts (LO 1b,1c,3a, 3b). You will also be able to practice and consolidate those skills through the development of an assessed project proposal, (LO 1a, 1b, 2a, 2b, 3a, 3b). ESD is explicitly covered throughout the module, through lectures and the case study element of seminars. Topics covered
include, research ethics, plagiarism and socially responsible research (LO 1e).
