BDA	University of Bradford / Semester 1 (Sep - Jan)

Module Aims

This module aims to provide an appreciation of the international law of sustainable development by introducing key international legal frameworks and institutions related to sustainable development and by looking into certain important areas where international sustainable development law is being implemented.

The module also discusses practical issues related to sustainable development, such as those arising from the efforts to eradicate poverty and inequality and the support of the poor and disadvantaged. The areas of primary focus are: business, environment, human rights and international trade/commerce.

Outline Syllabus

Introduction to core concepts of sustainable development;
Crosscutting Issues in sustainable development law;
The status of sustainable development in international law and policy;
Contemporary issues related to the implementation of sustainable development in selected areas (business, energy, climate change, human rights, poverty eradication, intergenerational equity, trade/investment/commerce, IT, Artificial intelligence etc);
Building legal frameworks for a sustainable world;
The future of sustainable development law;

Module Learning Outcomes

On successful completion of this module, students will be able to...

- 1 Critically analyse at a practical and theoretical level, the contemporary political, social and economic context in which sustainable development law operates.
- 2 Appreciate the conceptual relationship between the elements of sustainable development and their underlying theoretical philosophy and frameworks.
- 3 Carry out independent research in the relevant field using a range of primary and secondary sources.
- 4 Use evidence, arguments, assumptions and abstract theories of international sustainable development law to formulate judgements or identify solutions to theoretical or practical problems.

Learning, Teaching and Assessment Strategy

Learning will be directed, supported and reinforced through a series of active and collaborative 2-hour workshops. Workshops will cover the underlying theory and consider issues of critical evaluation of sustainable development law through a combination practical questions and case studies. Successfully completing tasks set will require independent legal research drawing on variety of both primary and secondary materials and written and oral presentations by you. Oral feedback will be given in the class and opportunities for written feedback will be provided. Tutors will be available to meet you individually if requested to discuss further feedback opportunities and review your progress. Formative assessment will be made available to help you better prepare for the summative assessment.

All teaching will be supported by directed study and materials supplied through a virtual learning environment.

The assessment will test your knowledge and understanding of theoretical perspectives of the law and your ability to use theory to provide solutions to real world problems. It will include the submission of a written coursework of 4,000 words on a sustainable development law topic of your choice. The purpose of the assessment will be to offer, based on your own independent research, a critical account and evaluation of a contemporary problem, concept or court case or theory of the law of sustainable development. The coursework should contain a critical account of up to 500 words where you will have to explain and evaluate the learning process which you followed in order to complete the coursework and meet the learning outcomes which will be included in the overall 4000 word

submission. There will be elements of formative assessment which will support your development towards the final summative assessment.

Mode of Assessment

Type	Method	Description	Length	Weighting	Final Assess'
Formative	Coursework	A small case study including a reflective account.	0-2000 words	%	No
Summative	Coursework	Critical account and evaluation of a contemporary problem.	0-4000 words	100%	Yes
