Module Aims

The aim of this blended learning module is to enable students to gain bespoke skills and competencies associated with their area of practice. They will develop an understanding of advanced practice, subject specific principles and underpinning theory for examining their client group. Clinical skills in assessment will be developed in order to undertake safe examinations amongst specified client groups, with the ability to demonstrate higher level clinical reasoning and problem solving.

Outline Syllabus

Module Learning Outcomes

On successful completion of this module, students will be able to...

1.1 Identify and critically discuss deviations from the norm in the clinical examination.

1.2 Critically evaluate best practice and the core theories behind the clinical examination of a client, when considering research evidence, policies and guidelines.

1.3 Critically discuss relevant technical and pharmacological implications as applied to your client.

2.1 Demonstrate the ability to make appropriate referrals, with a differential diagnosis.

2.2 Critically analyse and synthesise the barriers and benefits to nurses/midwives taking on extended roles.

2.3 Critically reflect on the professional, ethical and legal issues around taking on an extended role, including professional accountability.

3.1 Demonstrate professional relationships with clients and other health professionals.

3.2 Utilise advanced problem solving and clinical decision making skills when managing cases.

Learning, Teaching and Assessment Strategy

Teaching is informed by research throughout the module content, which is delivered through a series of face to face & online activities to encourage critical thinking skills.

Teaching materials will support learning around physiology, pathophysiology, client assessment, care pathways & wider professional issues around extending roles.

Workshops are provided by lead professionals who share expertise to develop bespoke skills.

Timetabled face to face/online personal & group tutorials will develop academic skills & offer formative feedback on progress.

There will be the opportunity to practice the OSCE assessment.

Directed Study - relates to additional materials to aid learning. A significant part of the
program is spent undertaking work-based learning activities.

You will be supported by a nominated clinical supervisor who will be responsible for identifying key learning activities, aiding clinical skill development, reviewing clinical practice & signing the student as competent.

Clinical Practice relates to additional self-directed optional clinical opportunities that will assist learning.

There are 3 assessment types.
An OSCE: a series of stations in examination conditions that assess LO 1.1, 1.3, 2.1, 3.1, 3.2.
Case study on a client & condition or audit of your practice assessing outcomes: LO 1.1, 1.2, 2.2, 2.3.
Clinical logbook signed off by the trainer.
