Adult Cardiology: Examination, Assessment and Intervention

Module Code: NUR6005-C
Academic Year: 2018-19
Credit Rating: 30
School: School of Nursing and Healthcare Leadership
Subject Area: Nursing
FHEQ Level: FHEQ Level 6

Pre-requisites:
Co-requisites:

Module Aims
To enable students to develop knowledge and skills in the assessment of cardiac disease and abnormality.

Outline Syllabus
Keynote lectures on systematic anatomy and related physiology with specific emphasis on the electro-physiology of the cardio-thoracic system.
Pathophysiology.
Ischaemic heart disease in acute practice.
Indications, theory and practice of ECG examination.
Indications, theory and practice of cardiac pacing, 12 lead ECG and rhythm strips.
Interpretation of normality, interpretation and differential diagnosis of abnormality.
Recognition treatment and appropriate referral in cardiac practice.
Rehabilitation and health promotion in ischaemic heart disease and heart failure.
Ethical, legal and professional aspects of extended roles.

Module Learning Outcomes

On successful completion of this module, students will be able to...

1.1 Critically apply knowledge of cardiac anatomy, physiology and related pathophysiology in the assessment of adult clients.

1.2 Evaluate care and initiate appropriate referral in the acute and recovering phases on the basis of your assessment.

1.3 Understand the principles and practice of cardiac examination as well as the indications and implications of cardiac pacing.

2.1 Diagnose normality and undertake differential diagnosis of abnormality in the presentation of cardiac pathophysiology.

2.2 Initiate appropriate first line treatment of acute coronary syndromes.

2.3 Understand available treatment modalities and make appropriate referral.

2.4 Critically examine legal, ethical and professional issues in extended practice and the mechanisms for protection of public and practitioner.

2.5 Initiate health promotion and rehabilitation.

3.1 Demonstrate skills of assessment.

3.2 Apply problem solving and decision making skills within a specific context.

3.3 Maintain professional relationships with the multiprofessional team in the delivery of care.

3.4 Critically evaluate trends and drivers in the prevention and treatment of coronary heart disease.

Learning, Teaching and Assessment Strategy

Key lectures will deliver core content; providing students with the opportunity to acquire the information to enhance their knowledge about the pathophysiological/psychosocial impact of cardiac disease. This will be complemented by group discussions to allow students to apply this learning to their own role & examine how cardiac disease & care affects patients & their families (LO 1.1, 1.2, 1.3). Seminars, group discussions & tutorials will be used to facilitate individual learning & discussion focused on analysing interventions & the ethical & legal implications for practice with regard to assessment & managing acute & critically ill people (LO 1.2, 1.3, 2.3, 2.4, 2.5, 3.2). Directed study provides students with the
opportunity to undertake directed reading & to develop their own portfolio of learning to enhance transferable skills & knowledge relating to evaluation of own role & care provision (LO 1.2, 1.3, 2.1, 2.2, 2.3, 2.4, 2.5, 3.4). VLE will be used to provide access to online resources, lecture notes & external links to websites of interest. Other consists of opportunities to participate in practice within own or other clinical area & to enhance acquisition of skills in the interpretation & application of appropriate physiological & psychological knowledge & care for acutely ill people.

These opportunities will be linked to completion of competency outcomes assessed by a practice mentor (LO 1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 2.5, 3.1, 3.2, 3.3, 3.4).
Assessments 1 & 2 will assess LO 1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 2.4, 3.1, 3.2, 3.3
Assessment 3 will assess LO 1.1, 1.2, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3
