Evidence Based Diabetes Care

Module Code: NUR7041-C
Academic Year: 2018-19
Credit Rating: 30
School: School of Nursing and Healthcare Leadership
Subject Area: Nursing
FHEQ Level: FHEQ Level 7 (Masters)

Pre-requisites:
Co-requisites:

Module Aims

To extend and update student’s knowledge base and facilitate critical examination of the research-informed evidence on which provision of care and service delivery for the individual with diabetes is currently based. Examine opportunities to develop service and practice for people with diabetes.

Outline Syllabus

Pathophysiology of diabetes including blood glucose homeostasis. Classification, epidemiology and diagnosis including diagnostic criteria of the different types
Module Learning Outcomes

On successful completion of this module, students will be able to...

1. Apply a systematic knowledge & understanding of pathophysiology & epidemiology to demonstrate critical awareness of the different types of diabetes.
2. Apply knowledge of pharmacodynamics & pharmacokinetics & critically evaluate the current evidence base informing the management & treatment options of each type of diabetes.
3. Critically review & apply knowledge to the recognition & management of the acute & chronic complications of diabetes.
4. Apply knowledge of recent research to justify the development & improvement of diabetes care in your own clinical area.

2. Systematically assess complex data and apply knowledge to identify the type of diabetes experienced by patients and provide a rationale for that decision.
3. Justify strategies for the appropriate administration and/or teaching the self-administration of diabetes related therapies and for structured patient education.
4. Develop, implement evaluate and communicate appropriate person centred care plans for patients with diabetes.
5. Critically discuss the potential risk and appropriate management of acute and chronic complications of diabetes.

3. Critically reflect on own learning needs and apply current evidence from a wide range of sources to inform clinical practice and personal learning.

Learning, Teaching and Assessment Strategy

Research informed key lectures will deliver core content: providing students with the opportunity to acquire knowledge and develop conceptual understanding (LO 1.1, 1.2,1.3,1.4, 2.2,2.4 ). Seminars and group learning will be used to facilitate teacher/learner/ peer dialogue and inter-professional discussion and further develop and challenge conceptual understanding (LO1.1, 1.2, 1.3, 1.4, 2.1, 2.2,2.3, 2.4 3.1). Directed study provides students with the opportunity to undertake reading, participate in enquiry based learning, address individual learning needs and contextualise learning to the students own area of practice (LO1.1, 1.2, 1.3, 1.4, 2.1, 2.2,2.3, 2.4 3.1) VLE will be used to provide
access to online resources, lecture notes & external links to websites of interest. Labs and
practicals will be held, if appropriate, to acquire new skills. Other consists of opportunities
to participate in practice, enhance acquisition of skills and gain competence. Competence
will be assessed by an identified practice mentor (LO2.1, 2.2, 2.3, 2.4, 3.1). Formative
assessment and feedback at individual tutorials, meetings and through electronic
communication will facilitate reflection and student self-assessment. All learning outcomes
are assessed by Mode of Assessment 1. Skills in practice are assessed by mode of
assessment 2.
