**Module Aims**

(1) To develop an in-depth critical awareness of the principles of community development  
(2) Synthesise theoretical frameworks and research knowledge to explore the factors that foster sustainability of communities, maintenance of independence and empowerment, to enable effective partnership in health care delivery and its role in health promotion and public health practice.

**Outline Syllabus**

Concept of community: community development and its barriers, local and national policies with respect to community development, citizenship.  
Lay perspectives on health and disease and their determinants.
Philosophy of community-orientated and participatory approaches.

Principles of community participation: approaches/theories to community participation, collective action, understanding cultural diversity within communities, techniques for engagement, grass roots movements and its impact on community empowerment.

Participatory health needs assessment and community profiling.

Participatory, multi-disciplinary and inter sectoral health promotion approaches, including community development methods.

Methods of involving the public to improve health and reduce inequalities.

Theories of social capital, capacity building.

Advocacy and social action.

Ethical, legal and social considerations: social change and justice, equality, impact of oppression and marginalisation on health, legislation.

Module Learning Outcomes

On successful completion of this module, students will be able to...

1  1.1 Critically appraise the concept of community and its development with reference to the social, political, cultural and economic context.
   1.2 Engage in critical discussion of the importance of inter-sectoral working and its role in health promotion and public health.
   1.3 Engage in critical analysis and interpretation of the research evidence into the complex issues that underlie the ability to work with communities.

2  2.1 Critically appraise the principles of community development and how to support effective community action within their area of public health practice.
   2.2 Critically explore the principal methods for involving the public in decision making about health and health care and the development, implementation and evaluation of participatory approaches to health promotion and health care.
   2.3 Develop an awareness of social justice by demonstrating reflective initiative and personal responsibility.

3  3.1 Apply understanding of participatory approaches to the development and evaluation of a participatory intervention in health promotion.
   3.2 Work competently and collaboratively with community groups, statutory and voluntary organisations.
   3.3 Critically identify and discuss the contribution of various agencies involved in the community health and social care.

Learning, Teaching and Assessment Strategy

Research informed key lectures will deliver core content; providing students with the opportunity to acquire knowledge in-depth critical awareness to awareness to work collaboratively with communities, statutory and voluntary agencies to improve health and wellbeing (Learning outcomes 1.1, 2.1 and 2.2)

Seminars and group learning will be used to facilitate teacher/learner/ peer dialogue and inter-professional discussion and further develop and challenge conceptual understanding, demonstrate autonomy and engage in critical debate, self-reflection and critical evaluation; develop skills to work with others to plan, implement and evaluate programmes and projects as well as appraising policies to recommend changes to improve community health and wellbeing (Learning outcomes 2.3 and 3.1). Directed study and additional hours described as ‘Other’ will provide students with the opportunity to undertake directed
reading and to develop further their own portfolio of learning which will enhance transferable skills and knowledge related to the enhancement of critical thinking and analysis (Learning outcomes 1.1, 2.1, 2.2, 2.3, 3.1, 3.2 and 3.3); participate in enquiry based learning, address individual learning needs, contextualise learning to the students own area of practice, reflect on practice and will provide students with the ability to further enhance the acquisition of new skills in effective partnership in community health and wellbeing (Learning outcome 3.1 and 3.3). Assessment: All learning outcomes will be assessed by the assessment.
