Module Aims
To facilitate students development of academic study skills and introduce the differing forms of evidence, including research, which supports professional practice.
To enable students to demonstrate & apply professional knowledge, understanding of people as occupational beings and application of the occupational therapy process using appropriate professional and academic knowledge and skills.

Outline Syllabus
Academic study skills, literature searching, referencing  
Presentation Skills  
Research, Evidence based practice  
Occupation, health and wellbeing; personal and professional resilience  
Core skills, clinical/professional reasoning  
Application of theory into practice

Module Learning Outcomes

On successful completion of this module, students will be able to...

1.1 Demonstrate knowledge of the underlying concepts and principles associated with occupational therapy practice

1.2 Discuss professional issues concerning occupational therapy within health or social care environments

2.1 Apply knowledge and understanding of the occupational therapy process in relation to an identified practice area

2.2 Demonstrate awareness of people as occupational beings and understanding of the need for person/client centred practice

2.3 Discuss the links between theory, evidence and practice skills and apply these to demonstrate understanding of the importance of research and its use to support professional decision making

3.1 Demonstrate an ability to assimilate, evaluate and interpret information

3.2 Apply problem solving and clinical/professional reasoning skills to support occupational performance

3.3 Communicate information accurately and reliably, with structured and coherent arguments

3.4 Develop academic study and presentation skills

3.5 Successfully use information technology

Learning, Teaching and Assessment Strategy

Students will undertake a range of research informed learning and teaching activities including key lectures, tutorials and self-directed study to develop knowledge of research/evidence based practice and sound academic study skills (LO 3.3, 3.4, 3.5). Support for development of students’ academic skills will also come from University services such as the Library & Academic skills development unit, which will link into the taught and self-directed study activities. Seminars and tutorials will provide opportunities to further develop and apply knowledge and identify and resolve gaps in understanding (LO 1.1, 1.2, 2.1, 2.2, 2.3, 3.1, 3.2). In addition students will be expected to use their self-directed study time to assimilate knowledge gained from across the academic year. Formative assessment and feedback (2 hours) will be available through individual and group tutorial sessions & through electronic modes of communication which will facilitate
preparation for summative and self-assessment. All LO's will be assessed through assessment mode 1, an individual presentation which will require students to assimilate their learning from across the academic year.
