Module Aims

To critically evaluate contemporary and emerging issues in Logistics and Supply Chain Management.

Outline Syllabus

The module will cover topics that include:
* Introduction to Logistics and Supply Chain Management
* Supply Chain Objectives and Strategies
* Global Logistics Processes and Management
* Supply Chain Integration and Coordination
* Matching Supply and Demand
* Management of Supply Chain Relationships
Module Learning Outcomes

* Outsourcing Logistics
* Sustainable Supply Chains
* Emerging Issues in Humanitarian Logistics
* Emerging Issues in Circular Supply Chains

Module Learning Outcomes

On successful completion of this module, students will be able to...

1. Evaluate a range of theories, frameworks and principles relating to contemporary supply chain issues, adopt and, as necessary, adapt these to evaluate and develop global supply networks.

2. Critically analyse current trends in Logistics and Supply Chain Management.

3. Undertake personal research to support the evaluation of organisational problems and provide grounded recommendations.

4. Develop a range of leadership, management and IT-related skills and behaviours including individual, interpersonal and team-based skills.

Learning, Teaching and Assessment Strategy

This module will involve lectures and tutorials covering the content of the module. Tutorials will be designed around Problem Based Learning. In each alternate weeks you will be presented with a problem that needs to be solved in groups. The weeks in which you are not doing a tutorial, you will be doing your own research. This will ensure student-led learning. To assess learning outcomes 1, 2 and 3, you will be asked to provide coursework responses to any one topic covered in the module for an organisation where there is extensive use and application of logistics and supply chains. You will select one aspect of the topics covered for the coursework submission which is worth 70% of the overall mark.

To assess learning outcomes, 1, 2, 3 and 4, you will be asked to work in a team and give a presentation on one of the pertinent emerging issues in logistics and supply chain management. The group presentation will be on an agreed topic of interest and is worth 30% of the overall mark.
