Module Descriptor

Security: Threats and Security Analysis

Module Code: PES6009-B
Academic Year: 2018-19
Credit Rating: 20
School: School of Social Sciences
Subject Area: Peace Studies
FHEQ Level: FHEQ Level 6
Module Leader: Dr Simon Whitby

Additional Tutors:

Pre-requisites:
Co-requisites:

Module Aims

Taught by Team-Based Learning, this module investigates different critical approaches and theoretical concepts for use in the analysis of security dynamics and issues in Security Studies. It seeks to encourage reflection on the analytical, conceptual and theoretical and methodological issues that shape the ways in which security is thought about and practiced in contemporary global politics.

Outline Syllabus
Module Learning Outcomes

*On successful completion of this module, students will be able to...*

1. apply advanced concepts and theories in the study of security in the global system;
2. apply theoretical debates to various aspects of security, such as biosecurity, military security, economic security, environmental security and so on;
3. critically engage with key concepts and theories used in security studies, and apply those concepts and theories to an analysis of current and historical security issues.
5. further develop reading, analytical and evaluative skills, to analyse alternative interpretations and present information under pressure relevant to the subject.
6. evaluate data from a variety of sources and, express ideas clearly in writing;
7. demonstrate a range of skills relating to communication and problem solving in individual and group-work settings, and apply these skills in the delivery of an oral group-work presentation.

Learning, Teaching and Assessment Strategy

A combination of interactive lectures, team-based learning, and directed study develops knowledge and understanding of key theories, concepts, institutions and regimes (LO1). Team-based learning group work and directed study in preparation for an individual essay deepens and applies such understanding on selected topics (LO1, LO2), and develops group and individual and presentation skills (oral and written) (LO3). Summative assessment of all LOs is effectively achieved through a weighted combination of the above team-based learning group work and essays, which provide appropriate opportunities for students to demonstrate achievement of LOs at advanced levels.

Students will develop the knowledge, understanding and skills necessary to meet the learning outcomes of the module through the programme’s instructional learning and teaching strategy; team-based learning. Students will study the core knowledge-based content of the module out of class; this is then assessed through a series of individual readiness assurance tests (i-RAT), which are MCQ assessments for learning taken at regular intervals throughout the academic year. Students discuss the i-RAT assessment in teams of 5-7 and retake the assessment as a team (t-RAT). In class sessions, students will apply their new knowledge to a number of formative and summative team application exercises during the academic year.
