Module Aims

This module aims to provide the students with the opportunity to develop in-depth awareness and understanding of the processes and strategies for the sourcing of medicines and its relevance to the availability of affordable quality medicine. Students will also develop their knowledge and understanding of the principles of operations, supply chain and quality management, from raw materials sourcing through to the customer, including how to design and manage a sustainable supply chain and mitigate risks and emerging challenges within the pharmaceutical supply chain. This module will also examine

Outline Syllabus
Module Learning Outcomes

On successful completion of this module, students will be able to...

1. Critically review the design and composition of the pharmaceutical supply chain.
2. Examine the concepts of operations and supply chain management as applied in the pharmaceutical supply chain in contemporary society.
3. Examine associated healthcare theory and professional practice literature/theory as appropriate.
4. Enhance your interpretative and analytical skills through tutorial sessions and formative and summative assessment.
5. Develop team-working and technical skills through student-led tutorial sessions and problem identification and resolution in the summative assessment.
6. Communicate complex and sensitive information in an understandable form to a variety of audiences.
7. Work effectively independently and as a team member.
8. Demonstrate good IT skills.

Learning, Teaching and Assessment Strategy

This module will be delivered using a blended approach of lectures, tutorials, multi-media presentations, guest speakers and problem solving sessions. These sessions will introduce students to current supply chain/operations management research and theory, which will be complemented by student-led tutorial sessions. Both lectures and tutorials will provide students with the opportunity to appreciate and use the information disseminated to contemporary operational issues (learning outcome 1, 2, 3, 4 and 5). The lectures will be complemented and enhanced by multi-media sources (DVD media clips based on known companies, online sources e.g. YouTube, BBC News, professional articles etc) demonstrating the applicability of the material to businesses today (learning outcome 1, 2, 3, and 5). Guest speakers will also be factored into the tutorial schedule, either directly presenting to students or via Skype link (learning outcome 4 and 5). A number of tutorial sessions will be designed which are problem based and students will work together to present resolutions to
these problems based on pre-reading and teamwork (learning outcome 4, 5, 6 and 7).
Directed study will encourage students to read a broader range of sources to deepen their understanding of the subject matter from relevant credible sources (learning outcome 4, 5 and 6). The proposed assessment will be a group presentation (30 minutes) accompanied by an individual assignment (learning outcome 1, 2, 3, 4, 5, 6 and 7).
