Module Details

Module Title: Clinical Pharmacology
Module Code: CLS6001-B
Academic Year: 2019-20
Credit Rating: 20
School: School of Pharmacy and Medical Sciences
Subject Area: Clinical Sciences
FHEQ Level: FHEQ Level 6
Co-requisites:

Module Aims

To stimulate an awareness of pharmacokinetics, drug metabolism and transport, drug therapy in special populations and how these processes may vary between ethnic groups.

Outline Syllabus

Learning Outcomes

1. Discuss how drugs are absorbed, distributed and eliminated from the body and explain how these processes may differ in various sub-populations.

2. Evaluate the basis of drug interactions based on pharmacokinetic and metabolic parameters.

3. Interpret individual and population pharmacokinetic profiles.

4. Use coherent communication, analysis and problem-solving skills to apply your knowledge to new concepts and data.

Learning, Teaching and Assessment Strategy

Information outlining the knowledge and understanding required of this module is delivered in lectures and tutorials. Self-directed learning during directed study time using worksheets and in-class tests will develop your cognitive skills and tutorials/workshops will be used to reinforce the taught component. Formative assessments will be used to monitor your progress. Your knowledge base and critical analysis of the material will be assessed by an open-book examination and case study evaluation.

Please note:

This module descriptor has been published in advance of the academic year to which it applies. Every effort has been made to ensure that the information is accurate at the time of publication, but minor changes may occur given the interval between publishing and commencement of teaching. Upon commencement of the module, students will receive a handbook with further detail about the module and any changes will be discussed and/or communicated at this point.
