Module Aims

To provide students with an insight into the technologies which have risen to prominence in detecting, monitoring and predicting the risk of security breaches

Outline Syllabus

How organisations can defend themselves against breaches; technologies used to both defend and attack; motivation for attacks within security; The opportunity to participate in visiting speaker seminars to provide an industrial perspective on current and up to date security issues in the workplace.
Learning Outcomes

1. Understand key ethical, political and social issues of contemporary security and governance; critically engage with relevant key research;

2. Show an in-depth understanding of security practices of monitoring, intervention and decision making; apply and analyse issues of security from a number of different disciplinary perspectives.

3. Have further developed skills of research, problem-solving and communication; be a self-directed, independent learner who shows initiative and personal responsibility.

Learning, Teaching and Assessment Strategy

Formal input provided by lectures, supported by practical examples from videos, and readings. Case studies used, where appropriate.

Assessment by individual coursework takes account of issues relevant today and the theoretical material discussed in class. Supplementary assessment will repair deficiencies.
