Module Details

Module Title: Research Methods in Health and Sport (Mphysiotherapy)
Module Code: PAR6012-B
Academic Year: 2019-20
Credit Rating: 20
School: School of Allied Health Professions and Midwifery
Subject Area: Physiotherapy and Rehabilitation
FHEQ Level: FHEQ Level 6
Pre-requisites: 
Co-requisites:

Module Aims

To enable the student to develop practical experience of research design, research planning and proposal writing.
To consolidate problem solving and critical analysis skills.

Outline Syllabus

Concepts of Evidence Based Practice.
Nature of professional knowledge - empirical, ethics, personal, aesthetic.
Process for developing professional knowledge - research, audit, reflection.
Critical Review Databases (for example Cochrane, NICE, CRD).
Qualitative and quantitative research methods (Including Literature Review, Service Evaluation, Primary Research and Research Proposal).
Patient/service user involvement in research, audit & collaborative practice.
Health promotion and patient education.
Methods of data collection and interpretation.
Research ethics.
Presentation skills - Written and formative presentation to peers.
Formulation of a critically reasoned research proposal.

Learning Outcomes

1. Critique a diverse body of evidence related to the chosen question/topic
2. Critically analyse the nature and range of research required for decision making which informs evidence based practice.
3. Analyse and make reasoned judgement regarding the appropriateness and quality of research methods, data collection and statistics.
4. Critically Analyse and suggest appropriate research methods for a research question.
5. Critically Analyse the ethical and legal issues in developing knowledge for practice.
6. Identify and critically analyse the existing knowledge base.
7. Critically discuss the factors that can enhance and inhibit implementation of research findings in practice.
8. Explore the role of the service users and carers as collaborators in research.
9. Formulate a reasoned evidence based proposal for an individual project relevant to your field of study.
10. Plan and take responsibility for the development of own learning and knowledge in becoming a collaborative practitioner.
11. Demonstrate information literacy & proficient use of relevant electronic databases
12. Gather, analyse and evaluate research using appropriate methods from a range of sources.
13. Communicate professionally through presentation and analysis of a progress report.
14. Communicate professionally through academic writing and oral presentation Write to academic and professional standards.

Learning, Teaching and Assessment Strategy

Research informed teaching will further develop the theme of evidencing professional practice; students will examine the nature of evidence based practice. Research informed Key lectures will set out the core principles and concepts associated with understanding, analysing, critiquing and planning research. Seminars and group learning will be used to facilitate teacher/learner/peer dialogue, discussion and feedback to further develop and challenge conceptual understanding. Directed study provides students with the opportunity to undertake investigation, participate in enquiry based learning and address individual learning needs. VLE will be used to provide access to online resources, lecture notes & external links to websites of interest.

Formative assessment and feedback at individual tutorials, meetings, peer review and through electronic communication will facilitate reflection and student self-assessment. The feedback from the first summative assessment will also facilitate the formative process for assessment 2. LO 1, 8,12 &13 are assessed by Mode of Assessment 1 and LO 2, 3, 4, 5, 6, 7, 9, 10, 11 and 14 are assessed by Mode of Assessment 2.
### Mode of Assessment

*Please note:*

This module descriptor has been published in advance of the academic year to which it applies. Every effort has been made to ensure that the information is accurate at the time of publication, but minor changes may occur given the interval between publishing and commencement of teaching. Upon commencement of the module, students will receive a handbook with further detail about the module and any changes will be discussed and/or communicated at this point.
