Lectures	20

Availability	
Occurrence	Location / Period
BDA	University of Bradford / Non-Standard Academic Year

Module Aims
The module aims to develop knowledge, understanding, and application of therapeutic approaches and interventions, in relation to the field of Mental Health Nursing. This will aid you to meet the health care needs of individuals and their families / carers using a biopsychosocial approach.

Outline Syllabus

Critique the values held by mental health nurses, which inform the development of a therapeutic relationship.

Articulate and critique the pre engagement, engagement, therapeutic alliance, collaboration, transition and endings within the therapeutic relationship.

Evaluate boosters and barriers to therapeutic engagement.

Evaluate the nature of collaborative therapeutic relationships.

Critically evaluate the biopsychosocial model in relation to delivering therapeutic interventions for mental health conditions.

Apply case formulation within the context of the bio psychosocial model.

Critique the application of therapeutic risk assessment and risk management within therapeutic approaches.

Examine crisis intervention within the delivery of therapeutic approaches.

Discuss the nature of therapeutic one to one, group and family interventions within mental health care settings.

Examine multi agency working within mental health clinical settings.

Discuss and evaluate the Application of Mental Health legislation in relation to therapeutic approaches and critique ethical implications within this.

Evaluate the input of statutory and non-statutory provision for the delivery of therapeutic approaches, inclusive of service user led developments and inter professional working.

Evaluate the use of pharmacological approaches to enhance mental well-being to enable the delivery of therapeutic approaches on a one to one or group basis.

Evaluate the use of technology in the delivery of therapeutic approaches. Apply research to practice in respect of therapeutic approaches.

Learning Outcomes

Outcome Number	Description
01	Demonstrate effective communication skills to assess and meet the therapeutic needs of individuals and significant others.
02	Demonstrate patient centred collaborative working approaches in the delivery of therapeutic care.
03	Critically evaluate key legal and ethical principles within nursing practice of those requiring such care.
04	Critically apply in depth knowledge of the various therapeutic interventions in mental health care, through a biopsychosocial lens.
05	Apply the use of creative use of technologies in research and scholarly activities to transform care and meet the changing needs within mental health nursing.

Learning, Teaching and Assessment Strategy

This module adopts a range of learning and teaching activities to facilitate your learning.

Research informed key lectures will deliver relevant content providing you with the opportunity to critically evaluate the range of therapeutic interventions, theories and evidence that contribute to the mental health status of individuals.

This will be complemented by seminars and workshops to enable you to integrate relevant therapeutic intervention theories to help meet mental health needs.

Virtual Learning Environment (VLE) will be used to provide access to online resources, lecture notes and external links to websites of interest. You will submit an assignment plan as your formative assessment and feedback will be provided to facilitate reflection and student self-assessment.

The assessment of the module is divided into two summative assessment tasks which assess the learning outcomes of the module. Each summative assessment is described as a component of assessment. You will be offered the opportunity to submit an assignment extract as your formative assessment. Feedback will be provided on this submission to facilitate reflection and your self-assessment.

The feedback that you will receive from the formative assessment will help prepare you to write a summative essay with a word limit of up to 2,000 words. This assessment will assess learning outcomes 3 and 4 and 5.

You will also undertake one summative case scenario assessment which will assess learning outcomes 1 and 2. Prior to this summative submission you will have an opportunity to undertake a formative case scenario and receive feedback.

Mode of Assessment

Type	Method	Description	Length	Weighting
Summative	Coursework	Written Assignment the Electronic Practice Assessment Document	N/A	100%
Summative	Coursework	Case Scenario coursework	N/A	0%
Formative	Presentation	Formative Assessment 400 words of written assignment	400	N/A
Formative	Coursework	Case scenario	N/A	N/A
