

Module Details	
Module Title	Peace, Ecology and Resilience
Module Code	PES6008-B
Academic Year	2020/1
Credits	20
School	School of Social Sciences
Subject Area	Peace Studies
FHEQ Level	FHEQ Level 6
Pre-requisites	N/A
Co-requisites	N/A

Contact Hours	
Type	Hours
Online Seminar (Synchronous)	12
Seminars	11
Directed Study	178

Availability	
Occurrence	Location / Period
BDA	University of Bradford / Semester 1

Module Aims
<p>To give you an overview of a range of approaches to understanding and engaging with social-ecological systems and crises, and of some of the ways in which these are contested in theory and practice.</p> <p>To introduce key concepts that will enable you to assess the dimensions of, and prospects for, social-ecological resilience and/or transformation in the context of dynamic social, political, economic and environmental trends and crises.</p> <p>To give you opportunities to apply these concepts to case studies of real-world social-ecological systems, critically examining the diverse ways in which human actors are engaging with crises within these systems</p>

Outline Syllabus

The module will provide an overview of key concepts and ideas used in the analysis of social-ecological systems and the ways in which they have been employed, debated and critiqued by academics, policymakers, practitioners and activists. As we encounter these concepts, we will also critically analyse their implications for practice, drawing on a range of examples from diverse contexts.

Learning Outcomes

Outcome Number	Description
01	Distinguish key concepts and practices that inform human engagement with social-ecological systems and crises across relevant fields of policy and practice.
02	Employ relevant frameworks for understanding key dimensions of social-ecological resilience, crisis, adaptation and/or transformation in particular contexts and at different scales, with awareness of their strengths and limitations.
03	Evaluate initiatives aimed at promoting more resilient, sustainable and socially just communities.
04	Make informed suggestions for the design of ecologically appropriate, socially responsible and productive systems.
05	Work collaboratively in a team.
06	Weigh up arguments and make specific choices in relation to a range of problems.

Learning, Teaching and Assessment Strategy

Teaching and learning on this module involves a range of activities designed to help you achieve the learning outcomes. These include written, visual and spoken inputs, online and offline activities, directed study and practical exercises designed to develop your ability to assess dynamics of resilience, vulnerability, adaptability and transformability in social-ecological systems, and to critically consider their implications for the pursuit of peace and justice.

Formative assessment will include a series of tasks designed to help develop your capacity to fulfil the summative assessment. These will largely be carried out in preparation for and during classes, and you will receive feedback on your progress as you go along.

Summative assessment will take the form of a portfolio of work designed to test the learning outcomes for this module.

Mode of Assessment

Type	Method	Description	Length	Weighting
Summative	Coursework	A portfolio of work that demonstrates achievement of the module learning outcomes.	N/A	100%
Formative	Coursework	Individual and group tasks designed to support progress towards the module learning outcomes.	N/a	N/A

Please note:

This module descriptor has been published in advance of the academic year to which it applies. Every effort has been made to ensure that the information is accurate at the time of publication, but minor changes may occur given the interval between publishing and commencement of teaching. Upon commencement of the module, students will receive a handbook with further detail about the module and any changes will be discussed and/or communicated at this point.
