

Module Details	
Module Title	Applied Pathophysiology and Pharmacology in Acute and Long Term Conditions
Module Code	NUR7034-C
Academic Year	2021/2
Credits	30
School	School of Nursing and Healthcare Leadership
FHEQ Level	FHEQ Level 7

Contact Hours	
Type	Hours
Lectures	15
Work based learning	150
Tutorials	25
Directed Study	110

Availability	
Occurrence	Location / Period
BDA	University of Bradford / Semester 1

Module Aims
To develop and evaluate knowledge of general principles of pathophysiology and pharmacology that can be applied to your area of specialist practice and to common conditions that may co-exist with conditions of your specialist area. Synthesise theory and knowledge in pathophysiology and pharmacology in order to critically appraise the assessment and management of patients within the student's clinical setting.

Outline Syllabus
Acute and chronic inflammation and their application to COPD and asthma pathophysiology and pharmacology of diabetes, ischaemic heart disease and related cardiovascular disease, common bacterial infections, cancer, kidney disease and mental health conditions.

Learning Outcomes	
Outcome Number	Description
LO1	Critically analyse the literature and theoretical concepts related to the underlying pathophysiology of identified conditions.
LO2	Critically evaluate and apply recent research related to the pharmacological management of identified conditions.
LO3	Justify the assessment, planning and management of patients with complex conditions through a critical application of pathophysiology and pharmacology in your own area of practice.
LO4	Demonstrate the ability to become an autonomous learner through independent study and critical reflection on continuing development needs.
LO5	Demonstrate self-direction and originality in tackling and solving problems, and act autonomously in planning and implementing care.
LO6	Retrieve, evaluate and apply appropriate information to inform and develop clinical practice.

Learning, Teaching and Assessment Strategy
<p>Research informed key lectures be delivered in an interactive, online format providing students with the opportunity to acquire knowledge and develop conceptual understanding (LOs 1, 2 and 3).</p> <p>Tutorials and group learning will be used to facilitate teacher/learner/ peer dialogue and inter-professional discussion and further develop and challenge conceptual understanding (LOs 1, 2, 3, 5 and 6).</p> <p>Directed Study provides students with the opportunity to undertake reading, participate in enquiry based learning, address individual learning needs and contextualise learning to the students own area of practice (LOs 1, 2, 3, 4, 5 and 6). The Virtual Learning Environment will be used to provide access to online resources, lecture notes and external links to websites of interest.</p> <p>Labs and practicals will be held, if appropriate, to acquire new skills. 'Work-based learning' consists of opportunities to participate in practice, enhance acquisition of skills and gain competence. Competence will be assessed by an identified practice mentor.</p> <p>Formative assessment and feedback will be provided at individual tutorials, will facilitate reflection and student self-assessment. Students will have the opportunity to submit draft coursework for formative feedback. Formative quizzes will cover weekly topics and team-based learning will support preparation for assessment by offering students an opportunity to develop and test their knowledge prior to submitting summative assessment.</p> <p>LOs 3, 5 and 6 are assessed by the Clinical Competency assessment.</p> <p>LOs 1, 2 and 4 are assessed by the coursework assignment.</p>

Mode of Assessment			
Type	Method	Description	Weighting
Summative	Coursework - Written	2500 word assignment which critically evaluates a 'case history' taken from the students' clinical environment which i	100%
Summative	Clinical Assessment	Completion of competency outcomes as defined in practice	0%

Please note:

This module descriptor has been published in advance of the academic year to which it applies. Every effort has been made to ensure that the information is accurate at the time of publication, but minor changes may occur given the interval between publishing and commencement of teaching. Upon commencement of the module, students will receive a handbook with further detail about the module and any changes will be discussed and/or communicated at this point.
