

## Programme Specification

### Programme title:

Optometry Progression to Pre-registration Period (1 Year, Full Time, CPD)

Academic Year:	2018/19
Degree Awarding Body:	University of Bradford
Final and interim award(s):	Certificate Of Continuing Education
Programme accredited by (if appropriate):	General Optical Council (GOC)
Programme duration:	1 Year, Full Time,
UCAS code:	N/A
QAA Subject benchmark statement(s):	Optometry (2015)
Date of Senate Approval:	
Date last confirmed and/or minor modification approved by Faculty Board	April 2018

### Introduction

This programme is aimed at students who have not achieved the required degree outcome, 2:2 or above, from their period of study in a UK based BSc (Hons) Optometry programme. This degree outcome is mandated by the GOC in order to allow a graduate to proceed into the Pre-Registration Period.

Success in this programme of study does not alter the degree classification that has been awarded previously. Students should be aware that the GOC allow only one attempt at this programme of study

The aims and learning outcomes of the programme are informed by the Quality Assurance Agency for Higher Education (QAA) benchmark statement for Optometry 2015, the General Optical Council (GOC) specification for Optometry learning outcomes and clinical competencies 2016, and the University of Bradford Learning, Teaching and Assessment Strategy.

### Programme Aims

The programme is intended to provide:

- A1 A supportive, structured learning environment that encourages an attitude of continuing professional development and independent lifelong learning;
- A2 Diversity of approaches to teaching and learning, incorporating both formative and summative methods of assessment;
- A3 Integration of theoretical, practical and clinical aspects of the curriculum;

The programme is intended to encourage the development of:

- A4 A systematic understanding of the basic and clinical sciences relevant to the practice of optometry;
- A5 A professional attitude towards patients and colleagues;
- A6 A range of transferable (key) skills;
- A7 Interpersonal and communication skills, including effective use of relevant information technologies;
- A8 Awareness of the legal, ethical and commercial context of optometric practice;
- A9 Ability to think critically and proficiency in clinical reasoning;
- A10 Insight into research and scientific method;
- A11 Clinical competencies required for entry to the pre-registration period in optometry practice;

### **Programme Learning Outcomes**

To be eligible for the award of Certificate of Continuing Education at FHEQ level 6, students will be able to *demonstrate knowledge of*:

- LO1 The principles behind techniques used for the investigation of the visual function of the human eye
- LO2 The methods available for the correction of ametropia
- LO3 The fundamental techniques behind the assessment of ocular health
- LO4 The ethical principles underlying the practice of optometry and the role of optometry in a health care system
- LO5 The skills required to obtain and communicate relevant information from and to patients
- LO6 The principles underlying evidence based practice

In addition a student *will be able to*:

- LO7 Demonstrate an understanding and application of the principles behind techniques used for the investigation of the visual function of the human eye
- LO8 Demonstrate an understanding and application of the methods available for the correction of ametropia
- LO9 Apply a range of techniques to assess ocular and systemic health and recognise abnormal findings
- LO10 Apply ethical principles to the examination of patients
- LO11 Employ a range of skills to communicate effectively with patients and other health care professionals
- LO12 Detect and correct or relieve defects of visual function;
- LO13 Detect ocular disease or the ocular side effects of systemic disease;
- LO14 Produce and agree an appropriate management plan with a patient including referral to another health professional where appropriate;
- LO15 Demonstrate knowledge of the fundamental legal principles underlying optometry practice:

LO16 Complete the requirements for a professional Certificate of Clinical Competence, which includes an appropriate number of patient episodes and demonstration of the full range of clinical competencies as defined by the General Optical Council.

## Curriculum

### Stage 3

FHEQ Level	Module Title	Core/ Option/ Elective	Credits	Study Period	Module Code
6	Clinical Competence	Core	0	1 & 2	OPT6012-Z
6	Management of Ocular Disease	Core	40	1 & 2	OPT6019-D
6	Clinical Practice and Professional Practice	Core	40	1 & 2	OPT6017-D
6	Clinical Case Studies	Core	20	1 & 2	OPT6014-B

## Learning and Teaching Strategy

The Optometry programme articulates with the Learning and Teaching strategy of the University of Bradford.

A wide variety of teaching methods appropriate to the learning outcomes are employed throughout the programme. They focus progressively on student-centred approaches to learning, such that students are expected to take increasing responsibility for their learning as they progress through the programme, in order to encourage development of the attributes needed for lifelong learning and continued professional development.

Key skills are embedded throughout the curriculum.

## Assessment Strategy

Assessment provides an evaluation of the students' competence in meeting specified objectives, but it is also an essential part of the teaching and learning process. Properly selected assessment tasks signal the importance of particular content, concepts and skills, influence approaches to study and help students to allocate their time appropriately. Constructive and timely feedback on assessment helps students to gain a sense of achievement and progress, an appreciation of the performance and standards expected in a particular discipline or professional area, and to learn from their endeavours.

The Optometry programme aims to select from a range of assessment methods for each module. All modules include both formative and summative assessments. Formative assessment has a developmental purpose and is designed to help students learn more effectively by giving them feedback on their performance and on how it can be improved and/or maintained. Reflective practice by students sometimes contributes to formative assessment. Summative assessment is used to indicate the extent of a student's success in meeting the assessment criteria used to gauge the intended learning outcomes of a module or programme. In addition, some of the assessments in later stages of the programme, for example in clinical

practice, clinical case studies and the research project, are synoptic in nature. Synoptic assessments are those that encourage students to combine elements of their learning from different parts of a programme and to show their accumulated knowledge and understanding of a topic or subject area. A synoptic assessment normally enables students to show their ability to integrate and apply their skills, knowledge and understanding with breadth and depth in the subject. It can help to test a student's capability of applying the knowledge and understanding gained in one part of a programme to increase their understanding in other parts of the programme, or across the programme as a whole.

### Assessment Regulations

This Programme conforms to the standard University Assessment Regulations which are available at the link below

<http://www.bradford.ac.uk/agpo/ordinances-and-regulations/>

However, there is exception to these regulations as listed below:

1. There is no compensation. This means that all modules must be passed at 40% or higher in order to be eligible for a final award of Certificate of Continuing Education.

### Admission Requirements

The University welcomes applications from all potential students and most important in the decision to offer a place is our assessment of a candidate's potential to benefit from their studies and of their ability to succeed on this particular programme. Consideration of applications will be based on a combination of formal academic qualifications and other relevant experience.

The **minimum** entry requirements for the programme are as follows:

Applicants must have completed an Optometry programme within a UK university and been awarded a degree in either Optometry or Vision Science. Candidates who have left an Optometry programme before completing the final year are not eligible for this course.

### Recognition of Prior Learning

If applicants have prior certificated learning or professional experience which may be equivalent to parts of this programme, the University has procedures to evaluate and recognise this learning in order to provide applicants with exemptions from specified modules or parts of the programme.

### Minor Modification Schedule

Version Number	Brief description of Modification	Date of Approval (Faculty Board)
