Please note: This programme specification has been published in advance of the academic year to which it applies. Every effort has been made to ensure that the information is accurate at the time of publication, but changes may occur given the interval between publishing and commencement of teaching. Any change which impacts the terms and conditions of an applicant’s offer will be communicated to them. Upon commencement of the programme, students will receive further detail about their course and any minor changes will be discussed and/or communicated at this point.

Programme Philosophy

A feminist philosophy underpins the educational strategy of the School of Allied Health Professions and Midwifery. Influences of co-operation, inclusion, equality and reflexivity are embedded within our approach. Our scholastic environment exposes students to learning where all knowledge is valued; learning is transformational with a key focus on the development of self and others within a cultural and social
context for scholarship. Learning which is situated in the authentic world of midwifery clinical practice is actively encouraged. Intricate connections between practice, education and research are harnessed to develop midwives of the future.

Introduction

The MSc in Midwifery Studies is a three-year pre-registration midwifery programme designed to prepare students to become safe, competent, autonomous practitioners. Our programme philosophy underpins the development of an innovative and holistic curriculum designed to offer students an engaging and rewarding learning experience. The programme has an emphasis on maternal and neonatal wellbeing that commences in pregnancy, continuing until the end of the postnatal period. The curriculum reflects contemporary maternity provision, influential political drivers and current NHS demands. These drivers highlight the need for midwives to develop their role as practitioners, partners and leaders in delivering and shaping the future of maternity services.

Key topics explored within the curriculum include awareness of issues associated with perinatal mental health (Department of Health Mental Health Service Reform, 2012, Alliance, 2014, Maternal Mental Health Alliance, 2014), the patient safety agenda (Francis, 2013, Kirkup, 2015) and wider public health (Local Government Association, 2010, Kirkup, 2015, Office, 2011, The Stationery Office, 2011). Midwives are entrusted with providing and promoting safe practice by understanding the human factors which can influence people and their behaviour, this enables identification of what contributes to providing effective care (Chief Nursing Officers for England, 2010, Bromley, 2011, Rafferty et al., 2015). Midwives also have a major role in public health agenda to improve the health and wellbeing of childbearing women and their families and reducing health inequalities. The local, national and global perspective on public health is reflected in the programme learning and teaching strategy.

The programme is rooted in normality, which is a focus on normal, low risk midwifery care, whilst also preparing students to care for women with more complex needs. Students will engage in skills that are practiced ethically and informed by the NHS values in midwifery settings. In order to consolidate the student’s experience and to encourage the development of the role of lead carer, in the final stage of the programme the student will identify a caseload of women for whom they will provide midwifery care, under indirect supervision from their named mentor. This experience will build on leadership and decision-making skills and support the development of autonomous practice (Nursing and Midwifery Council., 2009, Chief Nursing Officers for England, 2010, Nursing and Midwifery Council, 2009). Students on the programme will be encouraged to embrace all learning opportunities and challenges to support development of their professional identity, self-awareness and resilience in order to prepare them for midwifery practice in the 21st century.

The curriculum offers a unique opportunity to engage in active integrated learning in both the academic and clinical environments. This full time programme differs
from other postgraduate courses as it is taught over 45 weeks a year for 3 years. The duration of the programme enables the student to meet the NMC (2009) standards for pre-registration education. Fifty percent of the time on the programme is spent in practice, forty percent in theory and ten percent available for reflection on practice and completion of the student’s Ongoing Record of Achievement (ORA) within the clinical practice e-portfolio. Students are fully supported in both clinical and academic environments by mentors and link lecturers. The programme fees are funded for EU nationals and students may be eligible for an NHS bursary. Students will study 180 credits of theoretical masters/level 7 content and 180 credits of clinical practice at Further and Higher Education Qualification (FHEQ) undergraduate levels 4, 5, and 6.

The range of practice placements offers a rich and diverse learning environment for students. Bradford and the surrounding area have a multicultural context that will see students exposed to people from diverse ethnic and socio-economic backgrounds. The city is home to a unique 20-year longitudinal cohort study, the Born in Bradford project, which is a cohort study of more than 13,000 Bradford babies born over a three-year period. Alongside this, there is an acknowledgement of the growing number of specialist services and community projects being developed and implemented to meet the health needs of an increasingly diverse population. Students on the midwifery programme will be exposed to changes in service provision as a direct result of the findings of this unique research study. Students will also have the opportunity to experience inter-professional and interagency working to maintain the health and wellbeing of mothers, babies and their families, and also develop an understanding of the multi-faceted role of the midwife in promoting sustainable communities.

The School of Allied Health Professionals and Midwifery has been unique in adopting and designing a curriculum presented totally through problem based learning (PBL), which has been delivered at the University since 2000. The theoretical aspects of this programme are organised using the principles of PBL, which is a research based teaching and learning strategy (Ozturk et al., 2008, Hmelo-Silver, 2004). Student led learning is facilitated to support development of academic, research, teamwork and leadership skills. Learning consists of studying PBL Enigmas (scenarios), with these being centred upon authentic practice issues. PBL is an educational approach that puts students at the centre of their learning and provides them with scaffolding for learning core principles referred to as threshold concepts. Threshold concepts are considered to be knowledge that constitutes a core principle essential to the student learning experience (Meyer and Land, 2003). The curriculum is underpinned by five threshold concepts: normality, reflexivity, ways of knowing, care ethics and professionalism. Through PBL students are able to develop depth and explore special interests to meet personal and professional development needs. Students are thus prepared to successfully meet the University and, Further and Higher Education Qualification (FHEQ) criteria for a Master of Science Degree and the NMC (2009) Standards for pre-registration midwifery education.
Students completing their programme here at the University of Bradford will experience a programme that has been at the forefront of innovative developments. For example, clinical practice has been graded since 1995, this has since become a standard requirement for pre-registration midwifery programmes (Nursing and Midwifery Council., 2010, Nursing and Midwifery Council, 2009). Achievement in the clinical practice environment makes a significant contribution towards the final degree outcome and classification. The midwifery programme at Bradford was also one of the first in the country to move the clinical assessment document completely electronically (clinical e-portfolio: Ongoing Record of Achievement). This enables authentic real time review of a student’s progress by students themselves, by academics and by clinicians at any time during their practice placement experience.

Students on the programme will develop their digital literacy, enabling them to harness available resources to enhance their learning, including use of the university virtual learning environment (VLE). A blended learning approach combines the creativity and flexibility of online learning and the interactive element of face-to-face campus sessions. The skills needed for IT literacy are developed through sustained utilisation of a number of VLE platforms and e-learning tools such as Blogs during PBL; clinical e-portfolios to record practice experience and clinical practice assessment; a number of e-learning packages to support delivery of care in placement; use of databases to conduct literature searches and for maintenance of a development e-portfolio detailing personal growth during the programme. Students will develop a range of attributes and skills including enhanced communication, team working, problem solving, autonomy and self-efficacy through completion of the programme, which are all valuable for employability in a wide range of roles. Our core aim is to prepare midwives who can provide safe and effective care for women and their families.

Programme Aims

The programme is intended to:

- **A1** Develop the skills and knowledge commensurate with a graduate which will enable students to meet National and European requirements for professional registration.

- **A2** Develop the skills and knowledge which will enable students to engage in an ethical, informed and skilled manner in contemporary midwifery practice and to live and work in a globally sustainable way.

- **A3** Develop the skills and knowledge which will enable students to meet the lifelong learning demands of working as autonomous practitioners within multi-professional teams and dynamic environments.
Programme Learning Outcomes

To be eligible for the award of Postgraduate Certificate at FHEQ level 7, students will be able to:

LO1 Identify the underlying concepts and principles associated with midwifery practice and demonstrate the ability to critically analyse, evaluate and apply these within the context of health.

LO2 Critically evaluate threshold concepts in order to interpret and synthesise evidence to develop lines of argument. Make evidence based judgments in accordance with theories and concepts relevant to midwifery practice.

LO3 Use creative arguments to explore the appropriateness of different approaches to solving problems related to health and wellbeing.

LO4 Communicate the results of their practice and written work accurately using a broad range of evidence to underpin structured and coherent arguments.

LO5 Be an independent learner capable of continuing their professional development, using skills in critical reflection, reflexivity, action planning and self-evaluation. Collaborate and build working relationship with others.

LO6 Use creative arguments to explore and critically evaluate knowledge of professional, political and ethical principles with an emphasis well-being and to undertake sustainable midwifery practice.

LO7 Critically reflect on midwifery clinical situations demonstrating knowledge of the qualities and transferable skills necessary for employment including: accountability, autonomy and responsibility for professional practice.

LO8 Practise safely under direct the supervision of a midwife to meet the competencies as set out by the NMC first progression point.

Additionally, to be eligible for the award of Postgraduate Diploma at FHEQ level 7, students will be able to:

LO9 Critically evaluate and synthesise midwifery knowledge, demonstrating an in depth understanding of health beliefs and concepts of wellbeing and the way in which these have developed.

LO10 Synthesise and apply underlying threshold concepts to the context of midwifery practice. Make evidence based judgments in accordance with theories and concepts relevant to midwifery practice.

LO11 Use creative arguments to explore knowledge and understanding of the main methods of enquiry in health and social care, critically evaluating different approaches to problem solving related to health and wellbeing.
LO12 Effectively communicate information, arguments and analysis in a variety of forms to specialist and non-specialist audiences including women and their families.

LO13 Skilled in critical and creative thinking and able to take personal responsibility for own learning whilst contributing to the development of peers through collaborative working in midwifery.

LO14 Critically evaluate and apply knowledge of professional, political and ethical principles with an emphasis on well-being and to undertake sustainable midwifery practice.

LO15 Critically reflect upon and evaluate decision-making demonstrating qualities and transferable skills necessary for employment including initiative in solution focused problem solving, personal responsibility and accountability in midwifery practice.

LO16 Practise safely as lead carer (with indirect supervision) in normal labour and contribute to multi-disciplinary team working to meet the NMC essential skills clusters for entry to the register for intrapartum care.

Additionally, to be eligible for the award of Degree of Master at FHEQ level 7, students will be able to:

LO17 Critically evaluate and interpret midwifery clinical situations on the basis of sound knowledge of physiological concepts and research informed evidence base of midwifery practice whilst promoting normality; placing the woman and her family at the centre of care.

LO18 Synthesise and apply underlying threshold concepts to the context of midwifery practice. Make evidence based judgments in accordance with theories and concepts relevant to midwifery practice.

LO19 Use creative arguments to explore and critically evaluate an area of public healthcare from a global midwifery perspective, drawing on main methods of enquiry in health and social care.

LO20 Communicate effectively and professionally information, problems or solutions to diverse audiences through a variety of media.

LO21 Assess and creatively manage own learning and contribute to self and peer development through collaborative working in both midwifery and multi-disciplinary groups.

LO22 Demonstrate a critical knowledge and in-depth understanding of professional, political and ethical principles, with an emphasis on midwifery from a global perspective, promoting well-being and sustainable midwifery practice and multi-disciplinary team working.

LO23 Critically reflect upon and evaluate decision making, demonstrating qualities and transferable skills necessary for employment including initiative in solution
focused problem solving, personal responsibility and accountability in midwifery practice.

LO24 Practise competently without the need for direct supervision safely and effectively whilst contributing to multi-disciplinary team working achieving all NMC (2009) requirements for entry to the register.

Placement and/or Study Abroad

This programme provides the opportunity for students to undertake a two week elective work placement or period of study at home or abroad related to aspects of local, national or global maternal health issues towards the end of the final year. The placement is for a minimum of 60 hours but can be extended to accommodate a longer period if required. Students are responsible for arranging and financing all expenses which completing such a placement would incur including travel and accommodation. Many undertake fundraising activities and some obtain support through successful funding or award applications. A report justifying the choice of placement area must be submitted prior to commencement. The learning experience is then presented to peers, academics and clinicians on completion. Planning, undertaking and evaluating the elective all form part of the students' clinical experiences and evidence for achievement of the placement will be submitted via a clinical e-portfolio: Ongoing Record of Achievement (ORA).

Learning and Teaching Strategy

The curriculum is based on the principles of active and collaborative learning, underpinned by the educational philosophy inherent in problem based learning (PBL). Student engagement is integral to learning situations which are participatory and collaborative. A variety of workshops will introduce students to simulation, using creative media for example film making and games using play to enhance learning. E-portfolios will be used to support students in documenting personal, academic and clinical learning gains and development throughout the programme; building skills in critical reflection, action planning and self-evaluation. Each episode of learning starts with an enigma, which is explored to identify prior knowledge and generate questions to promote problem solving in a stimulating learning environment. Students will be supported to enhance skills of research, and research appreciation, to enable them to examine empirical evidence pertaining to perspectives of women’s health in a national and international context. Key academics and clinicians will share their research being undertaken locally. Our threshold concepts, considered to be troublesome knowledge, underpin the student learning experience at each stage.

In the PG Certificate level (stage 1), PBL enigmas will introduce students to core social, cultural, psychological and ethical concepts, providing students with the early skills to work under the direct guidance of the midwife; understanding the rationale for support provided to women. The focus will be on the local community and key health and well-being priorities. Students practice skills will be underpinned by key lectures and workshops that integrate anatomy, physiology and sociological concepts. Learning activities will support the development of individual self-awareness and resilience. Additionally students will be supported by series of tutorials with research active staff to examine empirical research evidence to enhance student’s critical thinking skills.

As the programme progresses into PG Diploma (stage 2) student’s capacity for research analysis and application is increased, new study skill activities and
authentic scenarios bring together more complex concepts. Student focus will move to take on a national perspective of health and wellbeing and societal issues for women and their families. Key lectures and workshops develop students’ confidence in decision making within midwifery situations, which as students progress towards the end of this stage, will include care for women with increasingly complex needs.

In the Masters, (stage 3) students will enhance critical appraisal skills and knowledge of research methodologies. Students will be supported in applying their skills and knowledge by undertaking a critical review of a global aspect of maternal well-being in order to identify areas for potential practice development. Theoretical concepts of leadership and change management will add depth to the student’s study. Students will be able to identify individual strengths and areas for further development. The PBL enigmas in this year will enable students to explore complex clinical and global maternal health issues. These activities provide students with areas of theoretical depth, detailed midwifery practice understanding, and engagement in new ways of thinking. Practice placements will enable students to progress from indirect supervision to long arm supervision during the caseloading placement, demonstrating sound decision-making and leadership skills. The Theoretical weeks will vary from 35 – 40 hours per week and the practice weeks between 35 and 38 hours per week.

Clinical placement learning towards achievement of the competencies is supported by the allocation of students to a NMC sign-off mentor (Nursing and Midwifery Council, 2009). Students may also be allocated a co-mentor to facilitate learning opportunities. Whilst students will have a minimum of 300 hours for each module with their assessed placement there is a requirement that all students must complete 4600 hours by the end of the programme and therefore each year students will attend other learning environments for additional experiences. Students will also have support from a link lecturer via the Ongoing Record of Achievement (ORA), email and link lecturer placement visits.

Assessment Strategy

The assessment strategy complies with the University of Bradford regulations and NMC requirements for pre-registration midwifery programmes (Nursing and Midwifery Council, 2009, Nursing and Midwifery Council, 2009) and also encompasses the tenants of the University of Bradford Curriculum Framework. It addresses the need to assess knowledge, understanding and skill and their application in midwifery practice. The assessment strategy reflects the need to ensure that the programme produces midwives who are safe in practice and fit for academic award.

Assessment of theoretical components

The Curriculum Framework (2018) recommends diversity of assessment to examine a wide range of programme or module outcomes, therefore a range of summative assessment methods have been selected. Knowledge and understanding are assessed by Ipsative multiple choice questions (MCQ); this is a computer marked
exam. An Ipsative assessment enables the student to identify the breadth of knowledge required and then personal progression throughout the programme, enabling students to take responsibility for their own learning and development. The assessment strategy includes a synoptic assessment, which facilitates holistic assessment of a range of module learning outcomes. An opportunity to experience a range of assessment methods includes presentations, written assignment and critical writing BLOG. The student is enabled to demonstrate the acquisition and application of knowledge that includes the context of practice.

The curriculum assessment strategy also includes the use of formative assessment methods to support development of knowledge, understanding and assessment literacy. These will include a formative opportunity at both the ipsative and synoptic assessment methods described above.

**Assessment of practice**

The mentor for the placement assesses clinical practice, with the student demonstrating competency through actively engaging in the care of women and their families. Students are required to provide evidence of their learning in their ORA. The mentor verifies this information by undertaking a final placement interview, which includes grading of practice. The students are assessed against stage specific criterion that reflects students learning throughout each practice placement. Only mentors who meet the requirements for sign-off status and are on the mentor register assess students (Nursing and Midwifery Council, 2009). To meet the NMC criteria for grading of practice the final placement Ongoing Record of Achievement marks will count towards the final award and are embedded within the module Questioning Midwifery Knowledge (Level 7) portfolio of assessment.

**Assessment Optionality**

During the programme students will have the opportunity to submit selected assessments that have been developed from a range of formatively assessed work. Students will receive feedback and develop their work accordingly and then choose which piece to submit for summative assessment. Optionality not only includes choice of which piece of work to include, but also choice in topic focus.

**Assessment Regulations**

Detailed regulations for progression and award in the MSc Midwifery Studies programme its interim awards, can be found in appendix 2.

Due to the vocational nature of the programme and the requirements of the Nursing and Midwifery Council, the MSc Midwifery Studies programme falls outside the scope of the standard University Assessment Regulations and is subject to programme-specific regulations.
Admission Requirements

The University welcomes applications from all potential students and most important in the decision to offer a place is our assessment of a candidate’s potential to benefit from their studies and of their ability to succeed on this particular programme. Consideration of applications will be based on a combination of formal academic qualifications and other relevant experience. This programme is for current graduates that meet UK residency criteria.

The standard entry requirements for the programme are as follows:

- A first degree with a minimum of 2:2
- Plus minimum of 5 GCSEs at grade C or above, including GCSE English Language and Maths (NMC requirement) and either Biology or Combined Science.
- Agreement to undertake DBS and Occupational Health Assessment

Applicants require English Language at a minimum of IELTS 7.0 or equivalent, with no sub-test lower than 7.0

Candidates who meet the admission requirements will be offered a place subject to successful face to face interview.

Disability

All students are offered screening from the Disability Office, on entry at the start of the programme to aid identification of any specific learning difficulties. Students will gain access to information, which will provide specific study support.

Recognition of Prior Learning

The NMC does not permit the application of prior learning experiences within midwifery programmes learning to a registerable qualification.

Appendix 2: Programme Regulations

REGULATION GOVERNING THE AWARD

OF THE

DEGREE OF MASTER OF SCIENCE IN MIDWIFERY STUDIES

FROM ACADEMIC YEAR 2016/17

1. ADMISSION

1.1 All applicants must submit a formal application before beginning a course of study for a postgraduate award

1.2 An applicant for a course of study leading to the Degree of Master must have obtained the following:

   1.2.1 A Degree of Bachelor of an approved university or of the Council for National Academic Awards or of any other approved degree-awarding body.

2. STUDY REQUIREMENTS

This programme is made up of 180 credits at level 7 and 60 credits at level 4, 60 credits at level 5, 60 credits at level 6 studied over and will be studied over a three stage period.

2.1 STAGE 1

   2.1.1 Students must study units amounting to 60 credits at Level 7 and 60 Credits at Level 4 amounting to a total of 120 credits.

2.2 STAGE 2

   2.2.1 Students must study units amounting to 60 credits at Level 7 and 60 Credits at Level 5 amounting to a total of 120 credits.

2.3 STAGE 3

   2.3.1 Students must study units amounting to 60 credits at Level 7 and 60 Credits at Level 6 amounting to a total of 120 credits.

3. COURSES OF STUDY

3.1 Students will study linked units of no less than 60 credits at post graduate level and 60 credits, divided into two 30 credit modules at undergraduate level each year.

4. PURSUIT OF COURSE OF STUDY INCLUDING CREDIT IMPORTATION
4.1 This programme is exempt from the regulations related to Recognition of Prior Learning.

5. PROGRESSION BETWEEN STAGES

5.1 Students may progress from Stage 1 to Stage 2 of the programme if they achieve at least 40% in individual modules amounting to 120 credits, no compensation is permitted. All components of assessment must be passed at 40% or above, where a component has a higher pass mark the requirement will be indicated in the module descriptor.

5.2 Students may progress from Stage 2 to Stage 3 of the programme if they achieve at least 40% in individual modules amounting to 120 credits, no compensation is permitted. All components of assessment must be passed at 40% or above, where a component has a higher pass mark the requirement will be indicated in the module descriptor.

6. SUPPLEMENTARY ASSESSMENT

6.1 Students are permitted to undertake supplementary assessment on one occasion only for Level 7 modules, in line with Regulations Governing Postgraduate Awards.

6.2 Students may be permitted to undertake supplementary assessment on one occasions only for Level 4, 5 or 6 modules, in line with the requirements of the NMC (2009).

6.3 A student who does not meet the 40% pass in all components of assessment detailed in 6.2 will be required to withdraw from clinical practice modules and will be withdrawn from the programme.

7. PERFORMANCE IN SUPPLEMENTARY ASSESSMENT

7.1 Students who, following Supplementary Assessment, meet the relevant requirements set out above may progress to the next Stage of the course of study. Students who have undertaken Supplementary Assessment with a view to attaining an award as set out below and who now meet those requirements shall be eligible for the award in question.

7.2 Students who have exhausted all the attempts permitted by the Board of Examiners and still do not meet the requirements either for progression or for an award, will be required to withdraw from the course of study.

8. CARRY FORWARD OF MARKS

8.1 The maximum carry forward module mark awarded to students following Supplementary Assessment will be capped at 40 or higher where the required pass mark for that component is above 40.

9. ELIGIBILITY FOR AWARDS
9.1 POST GRADUATE CERTIFICATE IN HEALTH STUDIES- INTERIM AWARD

9.1.1 Post Graduate Certificate in Health Studies –To be eligible for the award of the Post Graduate Certificate in Health Studies, students must achieve at least 40 in individual modules amounting to 60 credits at Level 7.

9.1.2 Students who, in achieving the requirements set out in 9.1.1, attain an overall average of at least 58 in the assessments for the modules required shall be eligible for the award of the Postgraduate Certificate in Health Studies with Merit.

9.1.3 Students who, in achieving the requirements set out in 9.1.1, attain an overall average of at least 68 in the assessments for the modules required shall be eligible for the award of the Postgraduate Certificate in Health Studies with Distinction.

9.2 POST GRADUATE DIPLOMA IN HEALTH STUDIES - INTERIM AWARD

9.2.1 To be eligible for the award of the Post Graduate Diploma in Health Studies, students must achieve at least 40% in modules amounting to 120 credits at Level 7

9.2.2 Students who, in achieving the requirements set out in 9.2.1, attain an overall average of 58 in the assessments for the modules required shall be eligible for the award of the Post Graduate Diploma in Health Studies with Merit.

9.2.3 Students who, in achieving the requirements set out in 9.2.1, attain an overall average of 68 in the assessments for the modules required shall be eligible for the award of the Post Graduate Diploma in Health Studies with Distinction.

9.3 MSC IN IN HEALTH STUDIES – FINAL AWARD

9.3.1 To be eligible for the award of MSc in Health Studies, students must comply with the requirements as set out in 2.1, 2.2 and 2.3 and attain the following:

9.3.2 at least 40% in individual modules amounting to 180 Credits, all of which must be at Level 7.

9.4 DEGREE OF MASTER OF SCIENCE IN MIDWIFERY STUDIES FINAL AWARD

9.4.1 To be eligible for the award of the Degree of Master of Science in Midwifery Studies, and be eligible for registration with the NMC students must comply with the requirements set out in 2.1, 2.2, 2.3 above, and must achieve:

(i) the requirements set out in 5.1, 5.2
(ii) at least 40.0% in individual Level 7 modules amounting to 180 Credits, including individual components identified within individual modules that must be passed,

and
