

Management and Business Analytics BSc (Hons) Programme Specification

<https://www.bradford.ac.uk/courses/ug/management-and-business-analytics-bsc/>

Academic Year:	2022/23
Degree Awarding Body:	The University of Bradford
Subject Benchmark(s):	Business and Management (QAA 2015)
Target Degree Award:	Bachelor of Science with Honours (BSc Hons) Management and Business Analytics [Framework for Higher Education Qualifications (FHEQ) Level 6]
Interim/exit awards:	Ordinary Degree of Bachelor (BSc) [FHEQ Level 6] Diploma of Higher Education (DipHE) [FHEQ Level 5] Certificate of Higher Education (CertHE) [FHEQ Level 4]
Programme Admission:	September
Programme Modes of Study:	(UCAS code N102) 3 years full-time (UCAS code N103) 4 years full-time with placement year or study abroad

Please note: This programme specification has been published in advance of the academic year to which it applies. Every effort has been made to ensure that the information is accurate at the time of publication, but changes may occur given the interval between publishing and commencement of teaching. Any change which impacts the terms and conditions of an applicant's offer will be communicated to them. Upon commencement of the programme, students will receive further detail about their course and any minor changes will be discussed and/or communicated at this point.

Minor Modifications Schedule

1. June 2019: Updated Placement and Study Abroad
2. March 2020: Annual changes for 2020/21
3. September 2020: Confirmed adaptations for COVID-19. Specification made accessible.
4. April 2021: Updated Study Abroad
5. June 2021: Programme renamed. Rotated in AFE6013, MAR6014 and OIM6015. Specification reformatted with minor corrections and updated Admissions.
6. June 2022: Annual changes for 2022/23

Introduction

The BSc (Hons) in Management and Business Analytics aims to equip future leaders and managers with the essential knowledge, skills and professional standards necessary to work effectively within the dynamic global business environment. The rise in technological capabilities and computational advancements have made it easier for organisations to collect large amounts of data for decision-making purposes, leading to an increasing number of organisations successfully cultivating a data-driven culture. Therefore, having the appropriate analytical skills is a priority for today's managers.

The programme is designed with the intention to prepare students as future business managers and leaders who are proficient in engaging with data informed practice and decision-making. The core ethos of the programme is designed in accordance with the

University's mission 'Making Knowledge Work' in order to provide latest management and business analytics skills for making informed decisions and foster a better quality of management as a profession. Moreover, students will learn about the tools and techniques necessary for managing their self-development as a manager in alignment with their employability aspirations in an inspiring and innovation led environment.

This programme is designed with inputs from leading industry professionals and focuses on offering a balance between the mechanics of business analytical methods and the dynamics of business and management decision making processes. It provides students with a thorough grounding in management and business analytics and relevant topics, underpinned by the main concepts, theories, and techniques in the field. In addition, this programme aims at incorporating data analytics with management practices in mind. By taking a non-technical approach to big data and business analytics, the programme aims to equip students with the essential skills, hands on learning and experience to enter a business environment and succeed.

The non-technical approach of this programme places emphasis on the necessary soft skills which will assist students to frame and ask the appropriate questions relating to data use in business. The programme will help students with the ability to identify the types of data required to answer particular questions or address business issues, apply appropriate techniques which offer insightful answers, analyse and interpret data and make decisions based on the data, whilst also having the ability to correctly interpret and communicate the implications of data results to other stakeholders, thus ultimately using the evidence to inform practice.

Graduates from this programme will be able to contribute to business and society as a whole whilst applying the highest professional standards and will be capable of identify their own professional development requirements. Equipped with management and business analytics skills, knowledge and proficiency, students will be able to excel in the contemporary business environment that is driven by technology and big data.

Bradford Business Challenge (Final Year Project)

The Bradford Challenge takes place in the final year and is an Individual Project/dissertation which aims to consolidate students learning in previous stages by bringing them to a level appropriate to undertake a piece of individual in-depth research through the use of established research techniques and scholarship relevant to their degree/discipline. Therefore, students on this programme will be expected to take on challenges relating to Management and Business Data Analytics, thus this opportunity will support the students in the development of their graduate level attributes.

As part of The Final Year Project, students have three options to choose from:

1. **The Bradford Challenge:** Students have the opportunity to put the skills they have accumulated during the programme to practice by searching and discovering solutions to the various strategic, marketing, managerial, financial and operational levels challenges faced by Businesses in the Yorkshire Region. Students work with local businesses to address a specific management and/or productivity challenge and the School of Management offers students the opportunity to undertake this project for a

business. In doing so, the student tackles a real problem or opportunity chosen by the business that affects it, which leads to a final report for assessment.

2. **The National Industrial Challenge:** Students have the opportunity to focus on various strategic, marketing, managerial, financial and operational levels challenges faced by Businesses nationally which is in line with the National Industrial Strategy of the UK.
3. **The Global Challenge:** The Global Challenge will focus on researching and exploring the development of potential solutions in the area of the Sustainable Development Goals identified by the United Nations Development Programme. These include, industry innovation, decent work for all, economic inequality, climate change, affordable and clean energy, sustainable consumption, sustainable cities and communities among other priorities. The Global Challenge will allow you to apply your idea and the theoretical concepts you have learned during the first two years at the School of Management where you can analyse, research and solve problems to support the Sustainable Development Goals through examples from within the local-Yorkshire region, National-UK or International-Global context.

Project allocation

Students will have the opportunity to meet organisations who will present their Business Challenges during Semester 1 of their Final Year. If students are interested in the topics presented, or if it is in line with their chosen topic, then they will be invited to take on a business challenge as the final year project through submitting a proposal to the final year project team. Instructions on how the proposal should be submitted and details of the selection and matching process of proposals with organisations will be explained to students during the module workshops. Students who opt not to take up the Bradford Challenge and proposals that are not matched against an organisation will be invited to elect the National Industrial or Global Challenge.

Programme Aims

The programme is intended to:

- A1. Develop business and management analytics professionals with a sound theoretical understanding of organisational activities and the complexities that arise in the management of these as a consequence of the interrelationships that exist between them.
- A2. Develop competence in a range of business analytics skills supported by a range of soft skills necessary to enable professionals to make effective and immediate contribution to the performance of an organisation in a range of functional areas.
- A3. Develop the necessary skills required to appropriately frame and ask relevant questions regarding data to relevant stakeholders
- A4. Develop non-technical skills which will allow students to understand how data analytics can be incorporated into the decision-making process to drive change

- A5. Gain an understanding of which analytical techniques are most appropriate in order to assist with particular business issues
- A6. Develop skills in using specialist vendor-based software, which is used widely in the business world and is considered one of the world's leading industry standard data analytics software.
- A7. Gain hands on experience of using an open-source software such as 'R', which will supplement their soft skills with technical skills to provide a rounded understanding of data analytics.
- A8. Provide a supportive, structured environment in which students are encouraged to become effective problem solvers capable of applying logical, critical and creative thinking to a range of business analytics related problems in various contexts.
- A9. Provide students with the skills and competences to enhance their employability and which will open opportunities for meaningful employment when they graduate.
- A10. Enable students to understand and become committed to ethical codes, social responsibility and sustainable development as a professional and citizen in local, national and global contexts.

Programme Learning Outcomes

To be eligible for the FHEQ Level 4 Certificate of Higher Education award, students will be able to:

1. Recognise the contexts in which management and business analytics operate and how it relates to other business disciplines, including accounting and finance, marketing, and the management of human resources.
2. Understand and demonstrate skills in fundamentals of analytics the creation and maintenance of a sustainable local, national and international business environment.
3. Develop numeracy, organisational, management and communication skills. They will also develop their capacity to work in a team and to work independently and to self-manage their learning.

Additionally, to be eligible for the FHEQ Level 5 Diploma of Higher Education award, students will be able to:

4. Show critical understanding, apply, and evaluate principles and concepts related to management and business analytics to support making informed decisions across a range of national and international business and organisational sectors.
5. Show critical understanding and ability to evaluate a range of methods and techniques for capturing and managing big data to contribute to organisational sustainability.

6. Demonstrate the ability to assess and critically analyse organisational functions in terms of legal, ethical, and strategic contexts and to relate that to modern professional practice and creative problem solving.
7. Review their on-going professional and career development, have an identified plan to maintain and improve their knowledge and skills through group work, academic writing and oral presentations

Additionally, to be eligible for the FHEQ Level 6 Honours Degree award of Bachelor, students will be able to:

8. Appraise and apply advanced specialist knowledge in management and business analytics in a range of applied business contexts and the relevant decision-making processes.
9. Critically evaluate and then apply appropriate theories, models, techniques and tools relevant to the analysis of Big data in a range of business and organisational situations across a range of local, national and international contexts.
10. Critically evaluate the development of appropriate strategies and policies in organisations in international business environments and engage using entrepreneurial and innovative approaches.
11. Critically evaluate and debate theory and practice, related to management and business analytics or Big data and present a coherent set of recommendations based on an evaluation of the arguments, assumptions and concepts.
12. Critically evaluate and debate theory and practice in written and oral presentations using a variety of current methods and take responsibility for successful collaborative working.
13. Show the skills required to be an independent learner and seek out solutions to unfamiliar problems.

Learning and Teaching Strategy

The programme of study has three, one year long, stages of study. Within each stage students will gain a range of knowledge and understanding specific to Management and Business Analytics and personal transferable skills, which will improve and enhance their ability to excel at university and beyond. To this end, teaching on the programme will be directed, supported and reinforced through a combination of synchronous online lectures, staff/student led group discussions, personal research and guided self-study, both face to face and online tutorials, seminars and directed reading.

The teaching content and learning material will be informed by timely research and underpinned by case studies of real organisations, which will aid students in acknowledging the opportunities and challenges associated with Management and Business Analytics from practical, real-life perspectives. More specifically, business

scenarios will be used during the in-class tutorials and specialist software workshops to offer practical, contextual learning.

These activities will all be further supported by the use of a virtual learning environment. Generally, the programme will aim to integrate applied and theoretical knowledge with assessment processes that test both knowledge of the discipline and understanding of its application and limitations. To facilitate learning, synchronous online lectures, synchronous online seminars, online workshops and face to face seminar and face to face workshops will typically utilise case studies and simulations. Sessions may be delivered weekly. Students will be encouraged to work in groups online to discuss case studies with oral feedback being presented online and where appropriate given in class.

Students will be guided to suitable primary and secondary data sources and be required to conduct research and presentation exercises. Resources to support the teaching and learning activity will be provided on the University's virtual learning environment. More specifically each of the stages will follow the main ethos described below:

Stage 1 of the programme contains a set of core modules and provides the foundation level understanding of core knowledge management and business analytics within the context of other business and management concepts. Alongside these, key graduate learner skills including communication and the correct sourcing, use of and presentation of information including referencing will be introduced. Such skills will enable students to write in an academic manner and begin to reflect on the value and usefulness of the information with which they are presented, engage in team working and consider their future career paths.

Stage 2 contains core modules in Management and Business Analytics and also Employability and Enterprise Skills. Employability and Enterprise Skills supports the attainment of more transferable skills such as problem solving and career enhancement. The broad range of options available throughout Stages 2 build on the underpinning knowledge gained at Stage 1. The focus here is more on interpretation and evaluation, rather than understanding and description.

In Stage 3 students will be prepared to demonstrate their ability as an independent learner. For Stage 3, advanced specialist knowledge is gained, and the enhancement of personal transferable skills is further developed. Students will be presented with teaching materials, methods and assessment strategies that will require them to be more evaluative and critical of theory and utilise problem solving skills, often in relation to advanced business scenarios, research information and communicate these effectively, either individually or as part of a group.

The School of Management has a long tradition for ensuring that students develop academically with knowledge, understanding and personal skills that are relevant and fit the needs of contemporary business. Together, the exploration of leading research ideas and the application of knowledge and skills to real business problems pose interesting and appropriate challenges to our students.

We understand students may arrive from school, college or some other route as a tutor dependent learner, following prescribed lesson plans and assessments. Through a transformational educational experience, students will graduate as an independent

learner, able to identify their own learning needs, sources of information and an ability to critically evaluate, reflect upon and develop their own learning. This process of transformation will be gradual, progressive and supportive. Through each stage of study progressively more advanced skills, experiences and expectations will be introduced, challenging students to mature as a learner within a supportive and developmental environment.

Assessment Strategy

The programme is formatively and summatively assessed by a mixture of written examinations, assessed coursework, case studies, group projects and presentations. Assessment is integrated with learning and teaching to support and demonstrate achievement of the learning outcomes for individual modules and the programme as a whole. Emphasis is placed on the feedback function of formative assessment as part of the overall assessment strategy. The students also have the opportunity to meet with members of the teaching team during their weekly 'feedback hours' if they require additional feedback or have any questions regarding material from their respective modules.

Stage 1 of the programme contains core modules and provides the foundation level understanding to support the attainment of learning outcomes 1 to 3. They are assessed by a mixture of examinations and individual pieces of coursework and group work, including [multimedia] presentations.

Stage 2 of the programme contains 5 core modules and one optional module, and provides the foundation level understanding to support the attainment of learning outcomes 4 to 7. These learning outcomes build on attainments from Stage 1 by providing more subject specific skills aimed at equipping the student with the practical ability to work with more advanced business analytics and introduction to Big data analytics. Learning outcomes 4 to 7 are assessed by a mixture of examinations and individual pieces of coursework and group work, including [multimedia] presentations.

Stage 3 cover learning outcomes 8 to 13 for an Honours degree. Stage 3 includes 2 core modules in advanced topics for aiming at gaining specialist knowledge in business analytics in addition to 2 optional modules in advanced topics in management and business. Assessment will be similar to that of Stages 1 and 2 in addition to a capstone graduation project that goes deeper into assessing critical evaluation of theory and problem-solving skills in relation to realistic business scenarios.

Curriculum

The Management and Business Analytics programme consists of 360 credits, made up of core modules and optional modules. Students take 120 credits at each Stage. Each 'Stage' or taught 'academic year' of an Honours programme consists of two semesters.

Stage 1

The Stage 1 curriculum has purposely been designed to introduce the fundamental of business analytics alongside the key functions of business and management operations to provide students with the necessary prerequisites and insights into how businesses operate, and the role data analytics can play in its day to day running. Students study 120 core credits:

Stage 1 Modules (CertHE)

Study Period	Code	Title	Credit	Level
Academic Year	AFE4015-B	Finance and Accounting for Managers	20	FHEQ 4
Academic Year	MAR4002-B	Foundations of Marketing	20	FHEQ 4
Academic Year	OIM4012-B	Fundamentals of Artificial Intelligence and Data Analytics	20	FHEQ 4
Academic Year	OIM4011-B	Operations and Technology Management	20	FHEQ 4
Academic Year	HRM4009-B	People, Work and Organisations/ Work in Context	20	FHEQ 4
Academic Year	OIM4013-B	Principles of Responsible Management and Practice	20	FHEQ 4

Stage 2

Students may elect to study Semester 2 of Stage 2 abroad at an international partner university. See the **Placement and Study Abroad Options** section for more details.

Stage 2 introduces the students to more advanced business analytics, with further specialisation into modules with a management orientation, thus allowing students to understand the relationship between business analytics and management. Students at Bradford study 100 core credits and select 1 20 credit optional module in Semester 2:

Stage 2 Modules (DipHE)

Study Period	Code	Title	Credit	Level
Semester 1	OIM5015-B	Big Data Analytics for Business	20	FHEQ 5
Semester 1	HRM5015-B	Entrepreneurship and Employability	20	FHEQ 5
Semester 1	SIB5001-B	International Business Strategy	20	FHEQ 5
Semester 2	OIM5016-B	Business Forecasting and Analysis	20	FHEQ 5
Semester 2	LAW4004-B	Business Law and Ethics	20	FHEQ 4
SEM2 Option	MAR5013-B	Digital and Social Media for Business	20	FHEQ 5
SEM2 Option	EAE5001-B	Entrepreneurship, Creativity and Innovation	20	FHEQ 5
SEM2 Option	MAR5007-B	Integrated Marketing Communications	20	FHEQ 5
SEM2 Option	OIM5009-B	Management of Information Systems	20	FHEQ 5
SEM2 Option	HRM5014-B	Organisational Design and Analysis	20	FHEQ 5
SEM2 Option	SIB5003-B	Strategic Management	20	FHEQ 5
SEM2 Option	OIM5020-B	Climate, Crisis and You	20	FHEQ 5

Between Stage 2 and Stage 3, students who did not take a Study Abroad Semester may elect to take a year in an integrated work placement or period of study abroad. See the **Placement and Study Abroad Options** section for more details.

Stage 3

The final stage of the programme provides the students with insights into advanced data analytics including latest trends such as Artificial Intelligence, which has been made possible through the rise in analytics. The core modules help consolidate the students understanding of advanced analytics, whilst the Final Year Project provides the students with the ideal platform to explore trending topics such as business analytics from within real world managerial contexts. Students study 80 core credits and select 2 optional modules, one each in Semester 1 and in Semester 2:

Stage 3 Modules (BSc)

Study Period	Code	Title	Credit	Level
Academic Year	HRM6013-D	Final Year Business Project	40	FHEQ 6
Semester 1	OIM6014-B	Applied Business Analytics and Simulation	20	FHEQ 6
Semester 2	OIM6015-B	Artificial Intelligence for Business	20	FHEQ 6
SEM1 Option	MAR6014-B	Digital Campaign Planning and Content Management	20	FHEQ 6
SEM1 Option	HRM6014-B	Leading and Managing People	20	FHEQ 6
SEM1 Option	AFE6013-B	Risk Management and Derivatives	20	FHEQ 6
SEM2 Option	HRM6010-B	Business Ethics and Social Responsibility	20	FHEQ 6
SEM2 Option	OIM6013-B	Logistics and Supply Chain Management	20	FHEQ 6
SEM2 Option	SIB6011-B	Multinationals in Emerging Economies	20	FHEQ 6

Please note: The curriculum may change, subject to availability and the University's programme approval, monitoring and review processes.

Placement and Study Abroad Options

This programme provides the option for students to undertake a work placement or period of study abroad between Stages 2 and 3. Students wishing to take this option will be registered for the 4-year programme.

We promote a placement or study abroad year as there is overwhelming evidence as to the benefits. Research indicates that students benefit academically and professionally from a period abroad as part of their degree. Undergraduate students who went abroad during their studies were more likely to find a graduate job and had higher starting salaries than their non-mobile counterparts (Source: International facts and figures 2019).

There are regular visits to the School of Management by representatives of both local and national companies, looking to recruit graduates. There are also great opportunities for

students to do shorter internships (6 or 8 weeks) or in-company projects. The International Opportunities team can advise students about the available funding to support their study or work experience abroad.

Placement Year (MAL5009-Z)

Work placements are extremely valuable in helping students to develop their understanding of all aspects of business. **A year spent in employment** provides an excellent opportunity to apply the knowledge, understanding and skills that students have developed during the earlier Stages of their programme. It will also enable students to further develop their transferable skills and may even secure their entry onto the graduate career ladder as many employers use a placement year as a method of recruitment onto their graduate training scheme. Our students are increasingly securing work placements, either during the summer vacation or for a full year in industry and the public sector, including with the competitive Government Economic Service placement scheme (e.g. Department for Work and Pensions, Department of Health and the Treasury), the European Bank for Reconstruction and Development, and a range of private sector companies involved in marketing, finance and the voluntary sector.

Students are responsible for finding a placement, but they are fully supported by our dedicated work placements team who will advertise placement vacancies, help them with applications, CV writing, interview techniques and preparing for their time in work.

Students taking a year will be registered for the 0-credit module MAL5009-Z Placement Year, and on completion of assessment on their return to Bradford will be eligible for an additional University Diploma award.

Study Abroad Year (MAL5010-Z)

Instead of a placement year, students can opt to **study abroad for one year** in one of our partner institutions worldwide, where students will be taught in English. Study abroad has a number of benefits, not only as a unique experience in itself but also enhancing academic insights, employability and life skills and the Faculty and the University wish to encourage it, if the circumstances are appropriate.

Any student wishing to study abroad for a year should contact at first instance the International Opportunities Team to discuss the available year abroad opportunities. Then, they will have to consult with the Faculty Exchange Coordinator on the academic aspects of the exchange including the programme and modules. The student will have significant freedom in the selection of institutions and modules during the year abroad exchange. Finally, the Bradford Programme leader will be informed and consulted about the exchange to ensure compliance with any Bradford programme requirements. During the exchange the students will have support from the relevant University services.

Students will be registered for the 0-credit module MAL5010-Z Study Abroad Year, and on completion of assessment on their return to Bradford will be eligible for an additional University Diploma award.

The list of exchange partners and network of Universities available for Study Abroad Year, as well as further information about international opportunities can be found online at: <https://www.bradford.ac.uk/exchanges/current-students/>

Study Abroad Semester

Alternatively, students can choose to **study abroad for Semester 2 in Stage 2** and only in specified approved partner Universities. This list is a subset of the Study Abroad Year partners offered and changes year-to-year depending on the curriculum offered.

This option can be available ONLY if the modules offered by the host institution allow the student to meet the learning outcomes of the Bradford Programme at stage 2 AND ONLY if the exchange does not have a negative effect on the professional accreditations of the Bradford programmes and modules.

Any student wishing to study abroad for a semester should first contact the International Opportunities Team to explore the opportunities and funding in place and, secondly, the Faculty Exchange Coordinator to check if the available options and relevant modules are in line with the University requirements. Following these checks, the International Opportunities Team and the Faculty Exchange Coordinator will liaise with the relevant Programme Leader to validate the modules and the semester exchange. Unlike the year abroad exchange, the semester exchange requires students to study only modules suitable to the Bradford programme when abroad. Therefore, all modules selected for the exchange will have to be mapped to the Bradford programme learning outcomes and be approved by the Programme leader and the Director of Studies in Bradford in advance of the exchange. During the exchange, if the student needs to change the modules, this can only be done after approval of the Programme Leader and Director of Programmes.

If the student fails a module abroad, the student must explore the possibility of re-taking any exams at the host university and inform immediately the International Opportunities Team and the Faculty Exchange Coordinator.

During the exchange, students will have support from the relevant University services. All credit successfully obtained whilst on study abroad semester will count towards the students final degree.

The list of exchange partners and network of Universities available for Study Abroad Semester, as well as further information about international opportunities can be found online at: <https://www.bradford.ac.uk/exchanges/current-students/>

Assessment Regulations

This Programme conforms to the standard University Undergraduate Assessment Regulations which are available at the following link: www.bradford.ac.uk/regulations

- At the end of stage 1, students will be eligible to exit with the award of Certificate of Higher Education if they have successfully completed at least 120 credits and achieved the award learning outcomes.

- At the end of stage 2, students will be eligible to exit with the award of Diploma of Higher Education if they have successfully completed at least 240 credits and achieved the award learning outcomes.
- On successful completion of Placement Year module MAL5009-Z, students will be eligible for the additional award of **University Diploma in Professional Studies**.
- On successful completion of the Study Abroad Year module MAL5010-Z, students will be eligible for the additional award of **University Diploma in Professional Studies (International)**.
- Students will be eligible to exit with the award of Ordinary Degree of Bachelor if they have successfully completed at 120 credits at Stage 1, 120 credits at Stage 2 and passed at least 60 credits by 40% or above at FHEQ Level 6 or above.
- Students will be eligible for the award of Honours Degree of Bachelor if they have successfully completed at least 360 credits and achieved the award learning outcomes.

Admission Requirements

We take into consideration a number of factors when assessing your application. It's not just about your grades; we take the time to understand your personal circumstances and make decisions based on your potential to thrive at university and beyond.

A typical offer to someone seeking entry through the UCAS scheme would be **112 points**, including one full A-Level or BTEC, with Grade 4 (national Grade C) or above in GCSE Maths and English or the equivalents in other RQF Level 2 qualifications such as Key Skills.

The standard requirements for international students apply for English language and numeracy. Visit <https://www.bradford.ac.uk/international/country/> for details of accepted equivalent qualifications from your country.

Access and Recognition of Prior Learning

Applications are welcome from students with non-traditional qualifications, and/or significant personal/professional experience.

The University of Bradford has always welcomed applications from disabled students. To discuss adjustments or to find out more about support and access, you may wish to contact the Disability Service before you apply at: www.bradford.ac.uk/disability/before/

Applications are particularly welcomed from adult learners (those aged 21+ at the start of the programme), armed forces families, carers and care leavers, estranged or orphaned learners, refugees and asylum seekers, and Romani or Traveller families. To find out more about the University of Bradford Progression Scheme, visit the webpage: <https://www.bradford.ac.uk/applicants/progression-scheme/>

If applicants have prior certificated learning or professional experience which may be equivalent to parts of this programme, the University has procedures to evaluate and recognise this learning in order to provide applicants with exemptions from specified

modules or parts of the programme. For more details visit our RPL webpage at:
<https://www.bradford.ac.uk/teaching-quality/prior-learning/>

Please note: These requirements are correct for the contemporary recruitment cycle and may be different when you are reading this document. The UCAS tariff applicable may vary and is published here:
<https://www.bradford.ac.uk/courses/ug/management-and-business-analytics-bsc>
