

MSc Specialist Healthcare Practitioner, Postgraduate Diploma Specialist Healthcare Practitioner, Postgraduate Certificate Enhanced Clinical Practitioner, Postgraduate Certificate Enhanced Nurse Practitioner

Programme Specification

Academic Year:	2023/24
Degree Awarding Body:	The University of Bradford
Subject Benchmark:	Health Studies (QAA 2019)
Target Degree Award:	Master of Science, Specialist Healthcare Practitioner [FHEQ Level 7] Postgraduate Diploma, Specialist Healthcare Practitioner [FHEQ Level 7] Postgraduate Certificate, Enhanced Healthcare Practitioner [FHEQ Level 7] Postgraduate Certificate, Enhanced Nursing Practice [FHEQ Level 7]
Interim/exit awards:	Postgraduate Diploma, Specialist Healthcare Practitioner [FHEQ Level 7] Postgraduate Certificate, Enhanced Healthcare Practitioner [FHEQ Level 7]
Accreditation:	Prescribing modules approved by NMC, HCPC, GPhC
Admissions:	September and January
Modes of Study:	36 months Part-time (MSc); 24 months (PGDip); 12 months (PGCert)

Please note: This programme specification has been published in advance of the academic year to which it applies. Every effort has been made to ensure that the information is accurate at the time of publication, but changes may occur given the interval between publishing and commencement of teaching. Any change which impacts the terms and conditions of an applicant's offer will be communicated to them. Upon commencement of the programme, apprentices will receive further detail about their course and any minor changes will be discussed and/or communicated at this point.

Minor Modifications Schedule

1. Minor adjustments for 2024-25 academic year – March 2024

Introduction

Experienced healthcare practitioners can take on challenging roles, working across professional, organisational and system boundaries to meet diverse patient needs (HEE 2017, HEE 2021, RCN 2018). The framework for advanced clinical practice which includes the four pillars of clinical practice, leadership, education and research are required by **all** healthcare practitioners working towards these senior professional roles (HEE 2020, HEE 2021, RCN 2018). Evidence of Masters level study is increasingly becoming an element of developing practitioner roles (HEE2020, HEE 2021, RCN 2018), whether this be a

Postgraduate Certificate (60 credits), Postgraduate Diploma (120 credits) or Masters degree (180 credits).

This programme is designed support experience healthcare practitioners including Nurses, Radiographers, Physiotherapy, Occupational Therapists, Dietitian, Speech Therapists to develop the skills in complex reasoning, critical thinking and analysis required to undertake these roles. The programme is designed to enable students to undertake a full masters programme of study but acknowledge that for many this may need to be completed in a stepped approach. Initially completing a Postgraduate Certificate or Postgraduate Diploma but continuing at a later stage to complete a full Masters.

The MSc Specialist Healthcare practitioner programme incorporates a range of modules and postgraduate certificates from the Faculty of Health Studies that are negotiated to provide an individualised curriculum that suits a student's particular learning or employment needs. Students will be guided in their module choices by the Programme Leader at a study planning meeting before the start of the programme. The students study plan will be reviewed on an annual basis with their Personal Academic Tutor (PAT). Students may wish to have previous accredited learning recognised through the University recognition of prior learning process.

Programme Aims

1. Provide a flexible educational framework that is vocationally relevant, which meets the advanced practice professional development needs of the student, as well as the organisational needs of employers.
2. Stimulate students to become autonomous self-directed learners who are motivated to sustain and advance their own continuous professional learning with a confidence to support the professional development of colleagues and the work of their organisations.
3. Develop advanced practice skills, knowledge, and critical understanding applicable to students own field of clinical practice.
4. Provide opportunities for inter-professional teaching and learning to share the knowledge, skills, and experience common to a range of different health and social care disciplines.
5. Develop students as an advanced practitioners who will innovate, promote evidence informed practice and improve service user outcomes.
6. Develop critical perspectives on research, knowledge development and change clinical practice and service delivery.

7. Develop students as a critically reflective, competent leader who will manage service development towards effective, sustainable, inclusive, fair, and ethically sensitive service provision.
8. Prepare students to become an autonomous advanced practitioner, to work in enhanced, specialist and advanced roles with high levels of accountability and innovation.
9. Develop an understanding of the theoretical constructs underpinning research or project management which will inform the undertaking of an ethical piece of research or service change project and the ability to demonstrate how the findings can influence clinical practice and policy.

Programme Learning Outcomes

Postgraduate Certificate

The aim is to develop the student as an enhanced practitioner within their area of clinical practice through the achievement of two of the four pillars of advanced clinical practice. This will be demonstrated by the achievement of at least two of the programme learning outcomes 1-5.

Postgraduate Diploma

The aim is to develop the student as a specialist practitioner within their area of clinical practice through achievement of the four pillars of advanced clinical practice. This will be demonstrated by the achievement of the programme learning outcomes 1-5.

Degree of Masters

Demonstrate understanding of the theoretical constructs underpinning research, evaluation and improvement to improve practice and policy within the student's area of clinical practice/specialty.

Programme learning outcomes.

1. Demonstrate mastery of the clinical knowledge and skills for the management of complex issues within their area of clinical practice.
2. Develop a detailed knowledge and understanding through critical analysis and synthesis of the literature and research that informs and influences the development of policy and service delivery in their specialist field.
3. Critically reflect on and develop their leadership skills and demonstrate leadership to support the professional development of colleagues and work of their organization.
4. Effectively communicate information, arguments and analysis in a variety of forms and share learning within their own clinical team and organization.
5. Demonstrate the ability to be an autonomous learner through independent study and critical reflection on their continuing development needs and those of their clinical teams and organization.

Additionally, to be eligible for the award of Degree of Master at FHEQ level 7, students will be able to:

6. Critically analyze and apply the research evidence that informs the development of policy and service delivery within their area of clinical practice.
7. Apply research, service improvement and re-design theory skills to influence and improve practice and policy in their area of practice.

Curriculum

This is a part-time programme of study that is intended to be completed over three years or in one-year steps.

Year 1 would entail the completion of one (60 credit) or two (30 credit) optional modules from the range of modules delivered by the Faculty of Health studies that address two of the 1-5 learning outcomes of the programme. Students can exit on completion of 60 credits with a Postgraduate Certificate.

Year 2 a further two modules from the range of modules offered by the Faculty of Health studies that ensures all learning outcomes 1-5 are addressed. Students can exit on completion of 120 credits with a Postgraduate Diploma.

Year 3 Completion of a 60-credit final stage module offered by the Faculty of Health studies which addresses learning outcomes 6 and 7. Students will exit with an MSc on completion of 180 credits.

Students choosing to exit with a PGC or PGD can return to the programme within 5 years to progress to the next stage of the programme by importing through the RPEL process the completed award into the next stage in the programme.

The choice of modules within the programme will be flexible and the individual students study plans will reflect their personal development needs to address the learning outcomes on the programme (Appendix A).

Postgraduate Certificate and Postgraduate Diploma

In years 1 and 2 of the programme, students will study and complete 1x 30 credit module per University semester.

Modules

Study Period	Module Code	Module Title	Credits	Module Type
Sem 1	Nur7034-C	Applied pathophysiology & pharmacology in acute and long-term conditions	30	Optional
Sem 1	NUR7033-C	Advanced Knowledge and Skills for the Management of the Critically Ill Adult	30	Optional
Sem 1	NUR7063-C	Minor Illness/Minor Injury	30	Optional
Sem1	NUR7035-C	Cancer - understanding, treatment, management and care	30	Optional
Sem1	NUR7042-C	Haematology and bone marrow transplant-understanding treatment management and care	30	Optional
Sem1	PRP7003-C	Skin Cancer Clinical examination and management	30	Optional
Sem1	MID7003-C	Outpatient Diagnostic Hysteroscopy and Therapeutic Practices	60	Optional
Sem1 and 2	LEM7011-C	Leadership for Advanced Practice	30	Optional
Sem1 and 2	PRE7004-C	Prescribing for Healthcare Professionals.	30	Optional*
Sem 1 and 2	RES7016-C	Research methods and Data analysis	30	Optional**
Sem1,2 or 3	HES7004-C	Independent Study	30	Optional
Sem 2	PRP7005-C	Advanced Physical assessment and clinical decision making	30	Optional
Sem2	NUR7065-C	Advanced Respiratory Practice	30	Optional
Sem2	NUR7074-C	Advanced Cardiology care	30	Optional
Sem2	NUR7073-C	Enhanced Paediatric care	30	Optional
Sem2	NUR7075-C	Care of Co-Occurring Mental Health and Addiction	30	Optional
Sem2	NUR7041-C	Evidence Based Diabetes Care	30	Optional
Sem2	NUR7023-C	Clinical Competence in Advanced Practice	30	Optional
Sem2	NUR7020-C	Advanced Communication Skills	30	Optional
Sem2	NUR7042-C	Symptom Management in Life Limiting Illnesses across the Lifespan	30	Optional
Sem1 and 2	RES7018-E	Service Evaluation and Improvement in Clinical Practice	60	Optional***
Sem1 and 2	RES7017-E	Dissertation	60	Optional*** #
Sem1 and 2	LEM7006-E	Management project	60	Optional***

*Please note: The non-medical prescribing module PRE7004-C is an optional module on this programme and is a recordable qualification with the NMC and HCPC. **This awards do not confer eligibility to register as a practitioner with the NMC or HCPC**

** # Res7016-C is a prerequisite for RES7017-E

*** one of the 60 credit final stage module must be completed to be awarded the MSc and can only be commenced on completion of the PGD.

Learning and Teaching Strategy

The student journey will be individualised to reflect their clinical roles and academic needs to address the development of required core knowledge and skills. Students will be expected to identify with the support of the programme lead and employer the appropriate structure of their learning. The structure of each module is designed to address specific learning outcomes and will incorporate a range of teaching methods which will include lectures (synchronous and asynchronous), practical sessions including simulation, seminars, group work and tutorials. The modules, particularly clinically focused modules offered within this programme included some element of campus delivery but where possible a blended approach is being incorporated into module delivery to facilitate student engagement. Work based learning is an element to several modules within the programme and along with the directed study elements of the modules is designed to support students to critically explore digest, synthesise information and translate research informed learning and achievement of the module learning outcomes into clinical practise. The mode of delivery for the modules will be explored with students as part of their study plan to ensure a study plan that address all the students' needs is developed.

The curriculum and delivery of teaching is informed by the university and faculty core values of inclusion, innovation, excellence and trust. Teaching is research informed through the incorporation of current evidence and exposure of students to a range of research to develop their understanding and ability to apply research in the workplace. Reflection is incorporated throughout the programme within both teaching and assessment continuing to promote development of reflective practitioners. The programme has been structured to be adaptable to individual learners promoting inclusivity and supporting learners to undertake and complete masters level study within the constraints of part time study and full-time employment.

The CANVAS virtual learning environment will be utilised to host all learning materials include access to remote delivery, recorded material and guidance and structure to directed study.

A range of teaching methods will be utilised within modules to address the learning outcomes for the individual modules with a blended approach to delivery with on campus

and online elements. Student participation will be integrated within all modules through a range of options including discussion boards, group work, team-based learning and simulation.

Modules with specific clinical outcomes to be evidenced in the workplace will be supported by a named work-based clinical supervisor and students undertaking a final stage module will be provided with a named academic supervisor. A suitable work-based supervisor is a healthcare professional with enhanced clinical skills within the student's area of clinical practice who will be identified by the student with the support of the student's employer. The role of the clinical supervisors is to support the student's development of clinical skills within the workplace and complete work-based clinical assessments. Support and guidance in relation to the clinical supervisor role will be provided to the clinical supervisors by the programme and module leads.

The summative assessments for the modules incorporated within this programme have been developed in alignment with the FHEQ standards and module learning outcomes. When multiple modes of assessment are utilised within a module the learning outcome assessed within each element is clearly identified on the module descriptors. Time allocated to practical assessments and exams are modified to reflect individual LSP's. Students are offered a resubmission for any elements failed following presentation at assessment committees and exam board.

Formative assessment is provided through a range of methods to reflect the mode of summative assessment. These including ongoing MCQ throughout the duration of the module where summative MCQ is an element of assessment, formative OSCE or simulation exams and tutorials with written feedback for written assignments.

Feedforward feedback for formative and summative under three headings What you did well, what you did not so well and, how your work could be improved is provided to support progressive development in the academic standard or work to support resubmission and achievement in subsequent modules.

Assessment Regulations

This Programme conforms to the standard University Postgraduate Assessment Regulations which are available at the link: <https://www.bradford.ac.uk/regulations/>

However, there are 2 exceptions to these regulations as listed below:

1. For all modules with a clinical component every element of the assessment must be passed at 40%, the pass requirement will be clear on individual module descriptors.

Admissions

This programme is for students who are registered healthcare professional working clinically with the United Kingdom.

The University welcomes applications from potential students regardless of their previous academic experience; offers are made following detailed consideration of each individual application.

Most important in the decision to offer a place is our assessment of a candidate's potential to benefit from their studies and of their ability to succeed on this programme.

Entrance requirements to undertake this programme of study may vary but consideration of the application will be based on a combination of the formal academic qualifications held and other relevant experience.

The entry requirements for this programme are:

- A registered qualification with a UK professional regulatory organisation.

And either:

- A first level degree in a health-related topic

or

- Applicants with an advanced diploma or evidence level 6 study (transcript to be provided) will be eligible to commence the programme.

or

- Applicants, without a first level degree but significant clinical experience and employer support will be considered for the programme after individual assessment by the programme lead.

Students for whom English is not a first language must have an IELTS score of 6.5 or equivalent

Access

Applications are particularly welcomed from returners to study aged 25 or over at the start of the programme, armed forces families, carers and care leavers, refugees and asylum seekers, and Romani or Traveller families.

All students are offered screening from the Disability Service on entry to the programme to aid identification of any specific learning difficulties. Students will gain access to information which will provide specific study support. Disabled applications are considered on the same grounds as all applicants. Applicants may wish to check with our Disability Service before applying by visiting: www.bradford.ac.uk/disability/before/

Recognition of Prior Learning

The University welcomes applications from all potential apprentices and most important in the decision to offer a place is our assessment of a candidate's potential to benefit from their studies and of their ability to succeed on this particular programme. Consideration of applications will be based on a combination of formal academic qualifications and other relevant experience.

If applicants have prior certificated learning or professional experience which may be equivalent to parts of this programme, the University has procedures to evaluate and recognise this learning in order to provide applicants with exemptions from specified modules or parts of the programme: www.bradford.ac.uk/teaching-quality/prior-learning/

Any student applying for the programme who has completed previous level 7 study at the UoB or other HEI should include the details of the previous study to enable identification of previous study that meet the learning outcomes for the programme to be imported into the award through the recognition of prior learning process.
